Rivers,2006 EVIDENCE IN TRAFFIC CRASH INVESTIGATION AND RECONSTRUCTION begins with a detailed description of the entire investigation process The material then graduates into the various phases and levels of investigations showing the levels of training and education normally associated with the levels of investigations and consequently the duties and responsibilities of the investigator and reconstructionist Using narrative schematics and photographs the mechanical inspection process is described in detail by identifying various vehicle parts explanations of their functions and methods of identifying failures Human related factors in traffic crash investigations are discussed at length including the traffic crash viewed as a systems failure Looming vulnerability a recently developed theoretical construct that helps to describe and understand social cognitive organizational and psychological mechanism is described Discussed also is the role of vision in driver performance perception as a four way process perceptions and reactions driver s reaction to stress and the roles of pathologists medical examiners and coroners in traffic crash reconstruction Who is an expert and expert evidence are described in detail Errors that can occur in the investigation

process and the tolerances that should be considered or allowed are explained. The manual also discusses the importance of calling upon the skills and advice of occupational specialists such as reconstructionists, lawyers, traffic engineers, pathologists, medical examiners and others to assist in the investigation and reconstruction of a crash that will ensure that the objectives of a thorough and complete investigation will be satisfied. Considerable effort has been made in the manual to explain how to identify, interpret and analyze all forms of highway marks and damages that can be used in the reconstruction of a vehicle-related crash. As a guide for investigators, prosecutors and defense attorneys, checkboxes are provided with many of the major topics that can be used as prompts in evaluating the thoroughness of an investigation or for those areas that might or might not need additional coverage at trial or litigation proceedings. To meet international requirements, mathematical references are described in both English U.S. and SI metric measurement systems, accompanied by various appendices covering symbols and mathematical conversions. Finally, there is a comprehensive quick find index that takes the reader directly to any topic, formulae or subject matter or any combination of these.

*Urban Machinery* Mikael Hård, Thomas J. Misa, 2008. *Urban Machinery* investigates the technological dimension of modern European cities, vividly describing the most dramatic changes in the urban environment over the last century and a half. Written by leading scholars from the history of technology, urban history, sociology and science, technology and society, the book views the European city as a complex construct entangled with technology. The chapters examine the increasing similarity of modern cities and their technical infrastructures, including communication, energy, industrial and transportation systems, and the resulting tension between homogenization and cultural differentiation. The contributors emphasize the concept of circulation, the process by which architectural ideas, urban planning principles, engineering concepts and societal models spread across Europe as well as from the United States to Europe. They also examine the parallel process of appropriation, how these systems and practices have been adapted to prevailing institutional structures and cultural preferences. *Urban Machinery* with contributions by scholars from eight countries and more than thirty illustrations, many of them rare photographs never published before, includes studies from northern and southern and from eastern and western Europe and also discusses how European cities were viewed from the periphery, modernizing Turkey and from the United States. Contributors: Hans Buiter, Paolo Capuzzo, Noyan Din, Kal Cornelis, Disco P. I. Germuska, Mikael Hård, Martina Heiler, Dagmara Jajesniak, Quast, Andrew Jamison, Per Lundin, Thomas J. Misa, Dieter Schott, Marcus Stippak. Mikael Hård is Professor of History at Darmstadt University of Technology. His books include *The Intellectual Appropriation of Technology: Discourses on Modernity 1900-1939*, coedited with Andrew Jamison, MIT Press, 1998. Thomas J. Misa is ERA Land Grant Professor of the History of Technology at the University of Minnesota, where he directs the Charles Babbage Institute. His books include *Modernity and Technology*, coedited with Philip Brey and Andrew Feenberg, MIT Press, 2003.
