World-class Tennis Technique Paul Roetert,Jack L. Groppel,2001 Top tennis experts contribute to this analysis of optimal techniques for all the essential strokes of the game 160 photos *Science and Racket Sports IV* A. Lees,D. Cabello,G. Torres,2008-07-29 Science and Racket Sports IV presents a selection of important contemporary research into the four core racket sport disciplines of tennis badminton squash and table tennis It showcases the best of the peer reviewed papers and keynote addresses presented at the Fourth World Congress of Science and Racket Sports Madrid Including contributions from many of the world s leading racket sport scientists researchers and practitioners the book details cutting edge research in six key areas Physiology Biomechanics Sports medicine Psychology Performance analysis Pedagogy sociology and coach education This invaluable collection touches on the most important issues within contemporary sport science and explores the full range of theoretical experimental and applied work within the study of racket sports It is essential reading for all sports scientists sports physicians therapists and coaches working in this area

The Biomechanics of Batting, Swinging, and Hitting Glenn Fleisig,Young-Hoo Kwon,2016-04-22 In the movie Bull Durham frustrated manager Joe Riggins stresses to his team This is a simple game You throw the ball You hit the ball You catch the ball This simplification works well for biomechanists too as sports can be broken down into specific physical tasks like throwing hitting catching and running There have been significant advances in understanding some actions but not others In the first ten years of the journal Sports Biomechanics only 18 of 236 articles were about hitting a ball This scarcity is startling considering that according to USA Today May 20 2005 three of the five hardest things to do in sports involve hitting a ball 1 baseball batting 4 golf tee shot and 5 tennis serve return This book provides the latest biomechanical research in the

under studied field of hitting a ball The biomechanics of baseball cricket hockey hurling softball table tennis and tennis are all examined The chapters are written in a style that will both satisfy the high standards of biomechanists and provide information for instructors and athletes to improve performance This book is based on a special issue of Sports Biomechanics

Algorithms in Decision Support Systems Vicente García-Díaz,2021-03-19 This book aims to provide a new vision of how algorithms are the core of decision support systems DSSs which are increasingly important information systems that help to make decisions related to unstructured and semi unstructured decision problems that do not have a simple solution from a human point of view It begins with a discussion of how DSSs will be vital to improving the health of the population The following article deals with how DSSs can be applied to improve the performance of people doing a specific task like playing tennis It continues with a work in which authors apply DSSs to insect pest management together with an interactive platform for fitting data and carrying out spatial visualization The next article improves how to reschedule trains whenever disturbances occur together with an evaluation framework The final works focus on different relevant areas of DSSs 1 a comparison of ensemble and dimensionality reduction models based on an entropy criterion 2 a radar emitter identification method based on semi supervised and transfer learning 3 design limitations errors and hazards in creating very large scale DSSs and 4 efficient rule generation for associative classification We hope you enjoy all the contents in the book **Tennis -**
