

## 5.2 CHARGING SYSTEM

## A.C. Generator

The charging characteristics of the A.C. generator used in the C50, C65, S50 and S65 when under a specified load are shown in the diagrams at the right. However, when additional loads are connected to the system such as fog lamps, and other accessories, there will be an increase in current draw by that amount and therefore, the charge cut-in speed of the generator will be at a higher speed and the charging amperage will be lower. (Fig. 5-6)

The charging performance for the A.C. generator on the C50M, C65M models under normal load is shown in the chart at the right. (Fig. 5-7, 5-9)

## Specification

- |                           |                    |  |
