#### A. Definitions

1. What is the difference between passing by value and passing by reference to a function?

Passing by value creates a copy of it and anything you do is local (does not affect original).

Passing by reference will pass the address to the function. Anything you change will reflect in the original value as well.

2. How does a function return a dynamic array?

returns a pointer to the address of the first item in the array

3. Explain the difference between the current size and the capacity of an array.

size is the number of elements  
capacity is how many elements the array can hold before needing to resize
