Language Development

Language Development is the process by which a child learns to use language. It is a complex process that involves the development of the brain, the vocal tract, and the social environment. The process begins with the child's first words, which are typically learned between the ages of 1 and 2. This is followed by a period of rapid growth, during which the child's vocabulary expands and their ability to use language in different contexts improves. By the age of 5, most children are able to use language fluently and to understand the meaning of complex sentences.
