18. **Efficiency:** "What do you mean efficiency? Efficiency is measured in terms of the ratio of the light energy to the other energy entering the system. In this case, a fluorescent tube has the energy of a photon and [2] the ratio of the light energy to the power. Most of it goes to the light energy, so the efficiency is high." (The student is correct.)

The light originates from the lightguide which already has, at the same time, the function of acting as a support with respect to light to reflect off the inside of an angle within the structure that is placed on the wall.
