

GLOBUS QUIZ 1 ANSWERS

PART 2

1. Which of the following does NOT accurately describe your company's camera/drone business and operations?

The company has two buildings for assembling products at its Taiwan site—one for cameras and one for drones. (the drone assembly process also includes assembly of an action-camera model having features and specifications suitable for use in camera-equipped drones).

No camera models or drone models are assembled in advance, warehoused in company facilities, and then used to fill incoming orders. Your company maintains regional facilities in Milan, Italy; Singapore, Sao Paulo, Brazil; and Dallas, Texas to handle the company's marketing efforts in each of the world's principal geographic regions. to support the merchandising efforts of area retailers who stock the company's brand of action-capture cameras and UAV drones, and to process camera/drone

warranty claims (including making needed repairs) originating in their respective geographic regions.

The unmanned aerial view (UAV) drones assembled at the Taiwan plant are sold directly to buyers at the company's website and to other online retailers of commercial drones in each geographic region.

The company makes the majority of the needed camera components at facilities close to its Taiwan assembly plant; newly-produced camera components are transferred by truck on a just-in-time basis to the company's camera assembly facilities where the company operates a 250-person assembly line capable of turning out 3,250 cameras per hour. There is ample space at the camera assembly facility to add two more 250-person assembly lines should they be needed later to fill incoming buyer orders.

Once the company's action-capture cameras are assembled and tested, the company ships

them across the world to multi-store chains and online retailers that sell electronics products

and to a wide variety of local retail shops stocking and merchandising (or sometimes renting)

action-capture cameras to their customers.

Globus Quiz Two Answers:

Bipolar Disorder :Am I Bipolar ? How Bipolar Quiz & Tests Reveal The Answers Heather Rose,2013-06-10 What is bipolar disorder Bipolar disorder also commonly referred to as the manic depressive disorder is a brain illness that is associated with abnormal mood swings activity and energy levels as well as the ability of the affected person to perform normal daily activities It can range from the lows of depression to the highs of obsession As a result of the depression one may lose pleasure or interest in a lot of the activities and end up hopeless or sad Whereas your mood may swing into obsession one may feel full of energy or euphoric The symptoms of this condition are severe and are quite different from the normal mood swings you undergo through from time to time These symptoms may result to poor performance in the work place poor performance in school suicide or damage your relationship However it is important to note that bipolar disease can be treated and those suffering from it may regain their normal productive lives This condition is very common in early adults and late teens Although some people develop early signs during their childhood many develop its signs late in their life Symptoms of bipolar disorder People suffering from this disorder often experience abnormal severe emotional states periodically One may experience a joyful period for sometimes and later the mood may change to a depression or an obsession period Another common symptom is the severe changes in activity behavior sleep or energy levels that are associated with the mood swings If you suffer from this condition you may experience periods of hopelessness loss of pleasure and interest in different activities including sex Other behavioral changes that are common include irritability restlessness poor concentration poor memory thinking about death problems sleeping and one is easily distracted Test For Bipolar Disorder The first step during test is a physical examination conducted by talking to a doctor it involves an interview as well as laboratory tests This disorder cannot be identified through a brain scan or a mere blood test however these tests are essential in ruling out other causing factors such as brain tumor or stroke If bipolar disorder is not caused by other illnesses then the physician may conduct a mental health examination The doctor checks on any bipolar disorder history in the patient's family line The test has to be conclusive to avoid mistaking it for the common unipolar disorder which is a major depressive disorder where the affected don't experience obsession Treatment Of Bipolar Disorder Currently there is no cure for this condition however different treatments are administered to help those suffering from this condition to gain much better control of their mood changes as well as the related symptoms Bipolar disorder is long term and recurrent therefore an efficient maintenance treatment plan should be used This treatment plan involves psychotherapy and other medication is essential in preventing relapse as well as minimizing the severity of its symptoms Since different people respond differently to medication then different medications may be used to treat this condition Among these medications include mood stabilizers lithium valproic acid as well as other anticonvulsant medications
