Utilization of AI Technology in Supply Chain Management Pandey, Digvijay, Pandey, Binay Kumar, Kanike, Uday Kumar, George, A. Shaji, Kaur, Prabjot, 2024-03-01 The surge in digital transformation and the integration of innovative technologies into manufacturing processes have given rise to a pressing issue in supply chain management. Businesses are in dire need of solutions to navigate this complexity and harness the true potential of intelligent supply chains. Utilization of AI Technology in Supply Chain Management is a comprehensive guide tailored for academic scholars seeking to unravel the mysteries of artificial intelligence (AI) and machine learning (ML) in the context of supply chain management. Amid the hype surrounding AI and ML, there exists a critical need to bridge the gap between human expertise and technological advancements. Utilization of AI Technology in Supply Chain Management addresses this necessity by delving into real-world instances where teams have successfully employed these innovative technologies to enhance supply chain performance, reduce inventory, and optimize routes. The adoption of AI and ML is not just a trend; it is the cornerstone of digital acceleration initiatives, making it imperative for scholars to understand and leverage these technologies effectively.

Emerging Engineering Technologies and Industrial Applications El Kacimi, Younes, Alaoui, Khaoula, 2024-05-06 Engineers have long been architects of progress, erecting massive buildings that touch the skies and designing technologies that redefine realms of known possibility. In this era of rapid change, keeping pace with innovation is the main challenge. Emerging Engineering Technologies and Industrial Applications is a comprehensive research book that delves deep into the heart of a relentless technological revolution within modern industry. From the limitless potential of the Internet of Things (IoT) to the cognitive wonders of Artificial Intelligence (AI), from the microscopic marvels of Nanotechnology to the precision and agility of Robotics, and from the revolutionary advancements in 3D Printing to the transformative capabilities of blockchain, this book explores emerging technologies. This book is an indispensable resource for professionals and researchers working in the field of emerging engineering technologies and their industrial applications. It caters to a diverse range of disciplines, including computer science and information technology, environmental, agricultural, and physical sciences, medical, healthcare, and life sciences, as well as science and engineering, and anyone seeking to navigate the current technological progress in the 21st century.

AI and Machine Learning Impacts in Intelligent Supply Chain Pandey, Binay Kumar, Kanike, Uday Kumar, George, A. Shaji, Pandey, Digvijay, 2024-01-29 Businesses are facing an unprecedented challenge: the urgent need to adapt and thrive in a world where intelligent factories and supply chains are the new norm. The digital transformation of supply chains is essential for staying competitive, but it is a complex journey fraught with uncertainties. How can organizations harness the power of emerging technologies like Artificial Intelligence (AI) and Machine Learning (ML) to increase profitability, cut supply chain costs, elevate customer service, and optimize their networks? The answers to these questions are crucial for business survival and success. *AI and Machine Learning Impacts in Intelligent Supply Chain* is a

groundbreaking book that offers a comprehensive solution to the challenges posed by the Industry 4.0 revolution. This book is your indispensable guide to navigating the intricate world of supply chain digital transformation using innovative technologies. It provides real world examples and insights that illustrate how AI and ML are the keys to solving complex supply chain problems from inventory management to route optimization and beyond. Whether you are an academic scholar seeking to delve into the impact of AI and ML on supply chain management or a business leader striving to gain a competitive edge, this book is tailored to meet your needs.

Logistics and Supply Chain Management, 2001 *Information Technology and Mobile Communication* Vinu V Das, Gylson Thomas, Ford Lumban Gaol, 2011-04-13. This book constitutes the refereed proceedings of the International Conference on Advances in Information Technology and Mobile Communication AIM 2011 held at Nagpur, India, in April 2011. The 31 revised full papers presented together with 27 short papers and 34 poster papers were carefully reviewed and selected from 313 submissions. The papers cover all current issues in theory, practices and applications of Information Technology, Computer and Mobile Communication Technology and related topics.

Production & Operations Management Mayank Kumar Agrawal, 2025-06-01 *Utilizing Blockchain Technologies in Manufacturing and Logistics Management* Goyal, S. B., Pradeep, Nijalingappa, Shukla, Piyush Kumar, Ghonge, Mangesh M., Ravi, Renjith V., 2022-01-21. Blockchain technology has the potential to utterly transform supply chains, streamline processes and improve the whole of security. Manufacturers across the globe face challenges with forecasting demand, controlling inventory and accelerating digital transformation to cater to the challenges of changing market dynamics and evolving customer expectations. Hence, blockchain should be seen as an investment in future readiness and customer centricity, not as an experimental technology. *Utilizing Blockchain Technologies in Manufacturing and Logistics Management* explores the strengths of blockchain adaptation in manufacturing industries and logistics management, which include product traceability, supply chain transparency, compliance, monitoring and auditability, and also examines the current open issues and future research trends of blockchain. Leveraging blockchain technology into a manufacturing enterprise can enhance its security and reduce the rates of systematic failures. Covering topics such as fraud detection, Industry 4.0 and security threats, this book is a ready premier reference for graduate and post graduate students, academicians, researchers, industrialists, consultants and entrepreneurs as well as micro, small and medium enterprises.
