Grading Strategies For The College Classroom A Collection Of Articles For Faculty:

Grading Strategies for the College Classroom Maryellen Weimer Ph. D., 2013 Grading Strategies for the College Classroom provides insights into managing the supremely complicated task of assigning a simple letter to a semester's work. It's a must read for any faculty member seeking to understand how to use assessment not just to measure performance but also to enhance it and it delivers some of the most current innovative ideas for meeting that challenge. It presents new thinking about what grades should measure. Ideas for developing robust assessment tools. Strategies for encouraging students to pursue knowledge instead of grades. Ways to ensure that assessments gauge performance and inspire effort. A collection of more than 30 articles written by a score of highly accomplished college classroom veterans. Grading Strategies for the College Classroom was edited by Maryellen Weimer Ph.D., author/editor of The Teaching Professor newsletter and award-winning professor emerita of teaching and learning at Penn State Berks. The book's articles first published in The Teaching Professor address four critical aspects of the assessment process: grading exams, assessing papers, gauging participation, and engaging students in meaningful conversations about grades.

Grading Exams The authors present creative solutions for the challenges of grading exams. Articles cover Alternatives to final exams including reflective exercises and concept mapping projects. Research showing why cumulative exams may be a better teaching tool than unit exams. How to design, administer, and manage security concerns for online exams. Policies that reduce test anxiety and mitigate morale problems.

Grading Papers This material is equally innovative when it comes to the challenges of assigning and assessing papers. Articles present a wealth of high impact ideas including A unique carrot and stick method to encourage students to create drafts of papers. Ten practical tips for successfully managing the paper grading burden. A manageable process-driven approach to grading that can be a lifesaver particularly for new faculty. A critical reexamination of the value of rubrics in grading papers. Best and worst practices in grading papers.

Classroom Participation Chapter three focuses on a perennial ambiguous grading area: classroom participation, providing insight into how student perceptions of participation can differ from those of faculty and how to reconcile the two. The authors share strategies for Creating a participation rubric. Helping students appreciate the difference between mere attendance and participation. Assessing and grading online participation. Reconciling rubrics with student self-assessments. Talking with Students about Grades. The book's final section addresses the difficult subject of managing expectations and conversations about students' grades. This process begins on the first day of class and continues past the final exam. Topics include how to Answer the question What will we be graded on? Handle the I deserve a better grade on this conversation. Involve students in determining assignment weights and how this impacts performance. Deal with students' growing sense of entitlement. The learning story that takes place over the course of a semester is rich, complex, and unique to each student. The details of how an individual progresses or does not over the term, what skills are developed and what knowledge is retained could fill a book. And yet in the end, professors are asked to tell the

story not in a book on a page over a paragraph or even in a sentence but in a single letter Small wonder grading is such a persistent challenge for both new and veteran faculty The foreword is by Barbara E Walvoord Ph D professor emerita of the University of Notre Dame and author of several classic books on higher ed assessment and grading including Effective Grading A Tool for Learning and Assessment *Grading Strategies for the Online College Classroom* Magna Publications Incorporated,2016-09-16 Practical methods designed to create more effective tests generate lively online discussions establish rapport with students furnish quality feedback in less time and communicate effectively online **Handbook on Measurement, Assessment, and Evaluation in Higher Education** Charles Secolsky,D. Brian Denison,2017-07-31 In this valuable resource well known scholars present a detailed understanding of contemporary theories and practices in the fields of measurement assessment and evaluation with guidance on how to apply these ideas for the benefit of students and institutions Bringing together terminology analytical perspectives and methodological advances this second edition facilitates informed decision making while connecting the latest thinking in these methodological areas with actual practice in higher education This research handbook provides higher education administrators student affairs personnel institutional researchers and faculty with an integrated volume of theory method and application **Teaching Strategies for the College Classroom** Maryellen Weimer Ph. D.,2013 This book is a classroom tested tool kit for faculty members who want to develop their teaching practice The 35 articles are drawn from the pages of The Teaching Professor newsletter and are written by college faculty They contain concrete pedagogical strategies that have been tested in the classrooms and form a handbook of classroom strategies **Grading With Integrity** Thomas R. Guskey,Nancy Frey,Douglas Fisher,2024-06-20 Let evidence and integrity guide your grading practice If you want to ask a polarizing question in education ask someone their thoughts on grading Few topics have elicited more interest or opinions even though grading practices have remained relatively unchanged for years But opinions are not evidence The time has come to get it right with a fresh approach grounded in research and the principles of integrity Grading With Integrity introduces a measured approach to grading reform based on honesty transparency accuracy and equity with recommendations backed by clear and trustworthy evidence Addressing the many whys involved this thoughtfully organized book addresses central questions related to grading and reporting student learning covering An historical overview of grading and reporting practices A discussion of standards based and competency based grading Recommendations for reporting non academic learning goals separately from academic achievement to accurately reflect students performance Suggestions for reporting growth and improvement using specific assessments and other reporting tools An infallible argument for grading with integrity This book is a must read for K 12 classroom teachers and administrators who are looking to implement better and more defensible grading and reporting policies and practices Let evidence and integrity be your guide to enhancing students best interests and learning success
