of dictionaries of English for foreign learners from their origins in Japan and East Asia in the 1920s to the computerized compilations of the present Monolingual dictionaries for foreign speakers were a revolutionary development at their outset and now represent a coming together of intellectual technological and commercial forces almost unequalled in book publishing. As the author shows the early history of EFL dictionaries was research driven arising directly from research in linguistic theory and language pedagogy now it is user driven determined by what users require or are thought to require. The pioneering dictionaries were the work of individuals. Current dictionaries are the products of huge databases manipulated by sophisticated processing as publishers strive to share an immense and ever growing global market. The book has both a thematic and a chronological structure. Three chapters describe the historical sequence over a period of some sixty years. These alternate with chapters dealing with phraseology, computers and corpus linguistics and research into dictionary users and uses. Three subjects central to the development of ELT dictionaries over the last thirty years. Anthony Cowie examines the way in which availability of massive computing power has transformed the recording and analysis of current speech and shows how the growth of research into the users and uses of dictionaries has led to developments both in ELT lexicography and method. This readable and non technical account is directed at professionals in applied linguistics and English language teaching and at lexicographers but it will fascinate everyone concerned with the analysis of English and faced with the challenge of recording the subtleties of its grammar and meaning.

**Performed Culture in Chinese Language Education** Guangyan Chen, 2020-06-22. **Performed Culture in Chinese Language Education** A Culture Based Approach for U S Collegiate Contexts elaborates on a cultural awareness oriented cultural performance based and cross cultural communication focused foreign language pedagogical paradigm. **Performed Culture Approach in the context of U S collegiate Chinese language education** Guangyan Chen draws on the data collected through questionnaires, comparisons between this pedagogy and mainstream pedagogical frameworks and analyses of curricular development, lesson plans and classroom discourses. Chen promotes the performed culture approach by delineating the theoretical framework of this pedagogy, reporting studies that empirically support cultural primacy in Chinese language education and illustrating this pedagogy through analyses of a curricular structure, a lesson plan and classroom discourses. Chen shows how this pedagogy addresses the gaps between the social need for global citizens and the insufficient integration of culture into foreign language education. The performed culture approach also addresses the overall drop in U S collegiate foreign language enrollment as this pedagogy connects foreign language programs to university missions and social needs. **Otto E.
