EHealth - For Continuity of Care C. Lovis, B. Séroussi, A. Hasman, 2014-09-30 Information technology and the information sciences have been part of our lives for some time now They have revolutionized the healthcare system changing the whole health landscape as well as health culture New devices sources of data and roles for all those involved in healthcare are being developed as a result This book presents the proceedings of the 25th European Medical Informatics Conference held in Istanbul Turkey in August September 2014 The conference aims to present the most recent developments in biomedical informatics The book is divided into 15 sections which include decision support systems and clinical practice guidelines improved healthcare through informatics data analysis mobile health technology and system evaluation and text mining The final two sections present posters from the conference The book will be of interest to all those in the healthcare sector researchers and practitioners alike who develop evaluate or work with information technology

Cross-Border Challenges in Informatics with a Focus on Disease Surveillance and Utilising Big Data L. Stoicu-Tivadar, S. De Lusignan, A. Orel, 2014-05-21 Achieving and maintaining cross border interoperability of electronic health records systems implies managing the continuous process of change and adaptation of a multitude of elements within and across electronic infrastructures in neighboring countries

This book presents the proceedings of the 11th Special Topics Conference STC of the European Federation for Medical Informatics EFMI held in Budapest Hungary in April 2014 The EFMI STC is an important international forum which brings together computer and information science medicine and technology to present results of current scientific work in health informatics processes systems and technologies The theme of EFMI STC 2014 is Cross border challenges in informatics with a focus on disease surveillance and utilizing big data and the conference addressed a range of important aspects of pan European and cross border issues

The book is divided into four sections health data sharing and integration opportunities and the challenges of working across borders sources of data including big data for monitoring and measuring health and disease using routine data for epidemiological study and public health as well as a section for posters presented at the conference

Given its interdisciplinary nature the book will be of interest to those working in a variety of disciplines including medical informatics bioinformatics and health informatics medical computing and technology public health health insurance and health institutional administration as well as other allied health professions

Project Management of Large Software-Intensive Systems Marvin Gechman, 2019-03-11 The book describes how to manage and successfully deliver large complex and expensive systems that can be composed of millions of lines of software code being developed by numerous groups throughout the globe that interface with many hardware items being developed by geographically dispersed companies where the system also includes people policies constraints regulations and a myriad of other factors It focuses on how to seamlessly integrate systems satisfy the customer's requirements and deliver within the budget and on time The guide is essentially a shopping list of all the activities that could

be conducted with tailoring guidelines to meet the needs of each project Global Navigation Satellite Systems Basudeb Bhatta,2021-05-09 Global Navigation Satellite Systems GNSS and their associated technologies have advanced by leaps and bounds in the nine years since the first edition of this book was published The concept of survey has changed especially in the disciplines of geomatics and geoinformatics This revised and updated second edition provides a thorough understanding of the basic principles and techniques of GNSS analyzes all four active systems and explains clearly how each of these systems works Because of its straightforward treatment of the subject readers will gain an insight into the techniques trends and applications of GNSS and develop knowledge on selecting an appropriate GNSS instrument Written for students and practitioners in geoinformatics geomatics engineering surveying and remote sensing and GIS this introductory and practical book includes questions and exercises in each chapter Key Features Furnishes detailed information on GPS GLONASS Galileo BeiDou and other regional and augmented systems Provides practical guidance for surveying mapping and navigation with GNSS Sheds light on the latest developments and modern trends of GNSS Includes a detailed glossary of related terms Contains many illustrations that complement the text Exercises for each chapter MCQ solution manual for mathematical problems and PPT as online resources *The Andes* Onno Oncken,Guillermo Chong,Gerhard Franz,Peter Giese,Hans-Jürgen Götze,Victor A. Ramos,M.R. Strecker,Peter Wigger,2006-11-22 This book provides the first comprehensive overview of a complete subduction orogen the Andes To date the results provide the densest and most highly resolved geophysical image of an active subduction orogen Innovations in Electrical and Electronics Engineering H. S. Saini,T. Srinivas,D. M. Vinod Kumar,K. S. Chandragupta Mauryan,2020-03-23 This book is a collection of selected research papers presented at the International Conference on Innovations in Electrical and Electronics Engineering ICIEEE 2019 which was organized by the Guru Nanak Institutions Ibrahimpatnam Hyderabad Telangana India on July 26 27 2019 The book highlights the latest developments in electrical and electronics engineering especially in the areas of power systems power electronics control systems electrical machinery and renewable energy The solutions discussed here will encourage and inspire researchers industry professionals and policymakers to put these methods into practice Surveying for Civil and Mine Engineers John Walker,Joseph Awange,2020-06-06 This updated and expanded edition of the book includes four additional chapters on earthwork on sloping sites transitional curves and super elevation calculations of super elevations on composite curves and underground mine surveying Richly illustrated with diagrams equations and tables as well as examples of every day survey tasks It also covers new topics such as the global navigation satellite system s Real Time Kinematic RTK which are increasingly used in a wide range of everyday engineering applications **Popular Science** ,2007-05 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Mergent OTC Unlisted Manual** ,2003 Remote Sensing Floyd F. Sabins, Jr.,James M. Ellis,2020-04-01

Remote sensing has undergone profound changes over the past two decades as GPS GIS and sensor advances have significantly expanded the user community and availability of images New tools such as automation cloud based services drones and artificial intelligence continue to expand and enhance the discipline Along with comprehensive coverage and clarity Sabins and Ellis establish a solid foundation for the insightful use of remote sensing with an emphasis on principles and a focus on sensor technology and image acquisition The Fourth Edition presents a valuable discussion of the growing and permeating use of technologies such as drones and manned aircraft imaging DEMs and lidar The authors explain the scientific and societal impacts of remote sensing review digital image processing and GIS provide case histories from areas around the globe and describe practical applications of remote sensing to the environment renewable and nonrenewable resources land use land cover natural hazards and climate change Remote Sensing Digital Database includes 27 examples of satellite and airborne imagery that can be used to jumpstart labs and class projects The database includes descriptions georeferenced images DEMs maps and metadata Users can display process and interpret images with open source and commercial image processing and GIS software Flexible revealing and instructive the Digital Image Processing Lab Manual provides 12 step by step exercises on the following topics an introduction to ENVI Landsat multispectral processing image processing band ratios and principal components georeferencing DEMs and lidar IHS and image sharpening unsupervised classification supervised classification hyperspectral and change detection and radar Introductory and instructional videos describe and guide users on ways to access and utilize the Remote Sensing Digital Database and the Digital Image Processing Lab Manual Answer Keys are available for instructors for questions in the text as well as the Digital Image Processing Lab Manual

Government Reports Annual Index, 1987 **Report of NRL Progress** Naval Research Laboratory (U.S.), 1979 Phage Therapy: Past, Present and Future Stephen T. Abedon, Pilar García, Peter Mullany, Rustam Aminov, 2017-09-05 Historically the first observation of a transmissible lytic agent that is specifically active against a bacterium *Bacillus anthracis* was by a Russian microbiologist Nikolay Gamaleya in 1898 At that time however it was too early to make a connection to another discovery made by Dmitri Ivanovsky in 1892 and Martinus Beijerinck in 1898 on a non bacterial pathogen infecting tobacco plants Thus the viral world was discovered in two of the three domains of life and our current understanding is that viruses represent the most abundant biological entities on the planet The potential of bacteriophages for infection treatment have been recognized after the discoveries by Frederick Twort and Felix d H relle in 1915 and 1917 Subsequent phage therapy developments however have been overshadowed by the remarkable success of antibiotics in infection control and treatment and phage therapy research and development persisted mostly in the former Soviet Union countries Russia and Georgia as well as in France and Poland The dramatic rise of antibiotic resistance and especially of multi drug resistance among human and animal bacterial pathogens however challenged the position of antibiotics as a single most important pillar for infection control and treatment Thus there is a renewed interest in phage therapy as a possible additive alternative therapy especially for the infections that resist routine antibiotic treatment The basis for the revival of phage therapy is affected by a number of issues that need to be resolved before it can enter the arena which is traditionally reserved for antibiotics Probably the most important is the regulatory issue How should phage therapy be regulated Similarly to drugs Then the co evolving nature of phage bacterial host relationship will be a major hurdle for the production of consistent phage formulae Or should we resort to the phage products such as lysins and the corresponding engineered versions in order to have accurate and consistent delivery doses We still have very limited knowledge about the pharmacodynamics of phage therapy More data obtained in animal models are necessary to evaluate the phage therapy efficiency compared for example to antibiotics Another aspect is the safety of phage therapy How do phages interact with the immune system and to what costs or benefits What are the risks in the course of phage therapy of transduction of undesirable properties such as virulence or antibiotic resistance genes How frequent is the development of bacterial host resistance during phage therapy Understanding these and many other aspects of phage therapy basic and applied is the main
