and Language Learning Eva Alcon Soler, Maria Pilar Safont Jorda, 2007-05-24 Eva Alc n Soler Maria Pilar Safont Jord Universitat Jaume I Spain The main purpose of the present book is to broaden the scope of research on the development of intercultural communicative competence Bearing this purpose in mind English learners are considered as intercultural speakers who share their interest for engaging in real life communication According to Byram and Fleming 1998 the intercultural speaker is someone with knowledge of one or more cultures and social identities and who enjoys discovering and maintaining relationships with people from other cultural backgrounds although s he has not been formally trained for

that purpose Besides possessing knowledge of at least two cultures is the case of many learners in bilingual or multilingual communities In these contexts the objective of language learning should then focus on developing intercultural competence which in turn may involve promoting language diversity while encouraging English as both a means and an end of instruction see Alc n this volume This is the idea underlying the volume which further sustains Kramsch s argument 1998 against the native non native dichotomy Following that author we also believe that in a multilingual world where learners may belong to more than one speech community their main goal is not to become a native speaker of English but to use this language as a tool for interaction among many other languages and cultures

Handbook of Research on Integrating Technology Into Contemporary Language Learning and Teaching Zou, Bin, Thomas, Michael, 2018-02-23 Technology has become an integral part of our everyday lives As today s teachers prepare to instruct a new generation of students the question is no longer whether technology should be integrated into the classroom but how The Handbook of Research on Integrating Technology Into Contemporary Language Learning and Teaching is a critical scholarly publication that examines the relationship between language education and technology and the ability to improve language education through technological advances Featuring coverage on a wide range of topics such as computer assisted language learning flipped instruction and teacher education this publication is

geared toward researchers practitioners and education professionals seeking relevant research on the improvement of language education through the use of technology Developing Language and Literacy in English across the Secondary School Curriculum Urszula Clark, 2018-07-21 This book draws on original research and a language based pedagogy approach to examine how secondary schools in the UK can devise and implement coherent language and literacy across curriculum policies and strategies so that grammar and associated metalanguage becomes an integral part of their day to day curriculum practices The research was undertaken in three 11 to 18 secondary schools in England where the majority of students are categorised as having English as a second language EAL and where a significant minority are also socially disadvantaged in two of the three The author argues that paying explicit attention to the linguistic structures through which subject knowledge is realised can be of benefit to all pupils in ways that are also socially just and democratic This book provides an important bridge between academic theory and educational practice that will appeal to applied linguists and sociolinguists as well as to teachers teacher trainers and practitioners *Boundaries of Morphology and Syntax* Lunella Mereu, 1999 The volume collects a selection of papers presented at a European Colloquium held at the Universit degli Studi di Roma Tre in October 1997 It focuses on phenomena at the boundary between morphology and syntax and provides analyses for data from the fields of both inflectional and derivational morphology and word order Morpho syntactic phenomena are analysed cross linguistically and cross theoretically as typologically different languages European Afro Asiatic American and Austronesian ones are dealt with and compared according to a variety of approaches from minimalism and lexical functional grammar to grammaticalization theory taking into account both synchronic variation and diachronic change The volume is divided into three sections I Morphological phenomena and their boundaries II Morpho syntax and pragmatics and III Morpho syntax and semantics as the interaction with the higher components of the grammar is seen as contributing to explaining variation in morpho syntactic behaviour *Forum* , 1982
