Construction Detailing for Landscape and Garden Design Paul Hensey, 2016-05-12 Designs for gardens and landscapes need to contain accurate information to ensure that both the designer's intent is clear and to enable the highest quality constructions. This book contains the elements most often used when detailing surfaces with key information on standards, guidance, and construction that the practitioner must be aware of. Alongside the text are 2D and 3D images with suggestions of measurements, design considerations, and materials. Key topics covered in this book are Vehicular paving, Pedestrian paving, and patios. Steps and ramps, Margins, edges, and kerbs, Drainage channels. To be used in conjunction with the book is an innovative online library of freely downloadable CAD SketchUp format details which link directly to those in the book. These details are available for the reader to edit, adapt, and use in their own designs and make the task of detailing for projects a little bit easier.

Landscape Architecture Documentation Standards Design Workshop, 2015-10-26 SUPERB EXECUTION RELIES UPON RIGOROUS PROJECT DOCUMENTATION. A project will only be built as well as it is documented. This publication focuses on the key documentation needs of the landscape architectural design and construction documentation process. That includes both design documentation and construction documentation as well as all that which occurs in the transition from one phase to the other. Documentation requirements include those components necessary to explore and define design intent, logic, physical proposals, and ultimately the specific components included within construction and bid documents. Discover how proper documentation facilitates every stage of the design process from pre-planning to construction and leads to a highly resolved built outcome. Understand the principles behind these documentation practices. Implement best practices specific to each documentation phase and drawing from title block and cover sheet design to soil plans and plant protection. Organize keynoting systems, cross-referencing, and interdisciplinary coordination amongst multiple consultants and vendors. Study sample project documents from a leading landscape architecture firm to better understand the elements and benefits of complete and well-coordinated project documentation. These standards have been time-tested by over 150 designers at the industry-leading landscape architecture firm Design Workshop, reflecting a range of project types including parks, streetscapes, urban spaces, and over-structure construction. This guide shares the methods behind the success to facilitate exceptional built outcomes through principled documentation practices.
