Wich, Lian Pin Koh, 2018-05-31 Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up to date data on the distribution and density of species as well as the threats to their habitats in their ongoing attempts to conserve and monitor biodiversity Conservation drones are low cost autonomous and operator friendly unmanned aerial vehicles that can be used for surveying mapping and monitoring both habitat and biodiversity They are fast becoming a valuable complement to ground based surveys and satellite imagery for a wide range of ecological and conservation applications The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community This website has proved highly popular and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation Guitar Hero Series , *Instructions for the Netherworld* Alberto Bernabé, Ana Isabel Jiménez San Cristóbal, 2008-01-30 Orphic gold tables are key documents for the knowledge of rites and beliefs of Orphics an atypical group that configured a highly original creed and that influenced powerfully over other Greek writers and thinkers The recent discovery of some tablets has forced a noteworthy modification of some points of view and a review of the different hypothesis proposed about them The book presents a complete edition of the texts their translation and some fundamental keys for their interpretation in an attempt at updating our current knowledge on Orphic ideas about the soul and the Afterlife stated in those texts The work is improved

with an appendix of iconographic annotations in which some plastic representations in drawings are reproduced related to the universe of tablets selected and commented on by Ricardo Olmos

**Radioman 1 & C** Earl E. Bush,1986 **Culture and Education** Filiz Meseci Giorgetti,Ali Arslan,Craig Campbell,2020-06-29 This book explores the fascinating and complex interactions between the ways that culture and education operate within and across societies In some cases education is imagined as an integrated part of general cultural phenomena in others educational interventions become the means for transforming the cultural circumstances of different populations The contributors to this volume show how certain educational practices produce new cultural and professional knowledge discuss the impacts of initially foreign educational ideas and institutions on established cultural institutions in very different societies and explore the impacts of modernity and modern educational ideas on more traditional gendered and religious practices and communities The book also provided striking examples of when these impacts were not benign Increasingly powerful twentieth century governments attempted to use education and schools to produce new reformed citizens suitable for their newly created colonial national socialist and fascist states The expectation was that cultural and social transformation might be engineered in major part through schooling This book was originally published as a special issue of *Paedagogica Historica* The Teachings of Jesus Christ Episcopal Church. *Technological Animation in Classical Antiquity* Tatiana Bur,Maria Gerolemou,Isabel Ruffell,2024-09-24 The persistent desire to animate inanimate objects has been a recurring theme in European culture dating back to ancient Greek and Roman times *Technological Animation in Classical Antiquity* aims to establish for the first time the significance of this aspiration and its practical realization within Greek and Roman societies While certain aspects of this narrative have been explored previously this study shifts the focus to place technological animation at the forefront The sixteen chapters examine the tangible existence of such devices across various media and considers their roles in diverse contexts delving into the reciprocal relationship between technological and material realities

and its influence on the concept of animation and vice versa By adopting this perspective technological animation not only provides a new understanding of the processes behind animation but also lends a fresh perspective to the animated artifact In contrast to other types of animation where the technologically animated artifact is often dismissed as a perceptual error induced for instance by rhetoric or magic this study separates technological animation from notions of rhetorical or magical skills theurgy or divine intervention Specifically it concentrates on a subset of artificial animation solely produced through technical procedures exploring how various motive forces actively contributed to giving objects agency and impacting their viewers illuminating how the material conditions of the artifacts themselves played a role in the process of technological animation whether through the distinctive materiality of bronze or the design of a statuette's hinge
