Het Levensmysterie En De Psychoanalyse:

The Letters of Sigmund Freud to Jeanne Lampl-de Groot, 1921-1939 Gertie Bögels, 2022-08-24 Freud wrote 76 letters to the Dutch psychoanalyst Jeanne Lampl de Groot between 1921 and 1939 These letters are personable lively and compassionate and convey his respect and caring for Jeanne who was his patient pupil and eventually his esteemed professional colleague The letters are sociohistorical documents that contain Freud's thoughts about pertinent issues in psychoanalysis and the interwar sociopolitical situation in Vienna and Germany Jeanne Lampl de Groot was an internationally known psychoanalyst who published extensively on psychoanalytic theory and practice She regularly wrote long letters to Freud when residing outside of Vienna seeking his advice on personal and professional matters and discussing with him her evolving ideas about psychoanalysis including her disagreement with Freud about female sexual development It is unfortunate that Jeanne had her letters to Freud destroyed because it sometimes makes Freud's somewhat elliptical responses difficult to place in context For example it is quite probable that she wrote detailed descriptions of her husband's emotional issues which Freud then merely alluded to Because we don't know the specifics of what she wrote his responses remain ambiguous and therefore problematic to translate Nonetheless Freud's responses do reveal a great deal about Jeanne and her passion for psychoanalysis The book also includes several of her letters to her parents which allows the reader to get to know Jeanne's intelligent thoughtful voice her thoughts about the evolving science of psychoanalysis her experience during her psychoanalysis with Freud and her concerns about the rise of anti-Semitism in Austria and Germany This book introduces to its readers a very personable Freud and provides insight into his thoughts about the development of critical psychoanalytic concepts such as the death drive masochism lay analysis and his changing views on the length of a psychoanalysis We also hear about historical events in the 1920s and 1930s as we witness Freud and Lampl de Groot move through their personal and professional lives with dignity and perseverance Sigmund Freud, 1856-1939 Christfried Toegel, 2024-05-02 Winner of the 2024 Gradiva Award for Best Book Sigmund Freud 1856-1939 draws on a wide range of primary sources to present all the datable events that took place in Sigmund Freud's life shining new light on his day to day experiences Christfried Toegel's work provides details and context for the personal social and political conditions under which Freud developed his theories during this time period The book's timeline presents not only significant events but also the small and everyday interactions and experiences in Freud's life Drawn from sources including Freud's calendars notebooks travel journals and lists of fees letters and visits this unique book provides unparalleled insight into his work Sigmund Freud 1856-1939 will be of great interest to psychoanalysts in practice and in training as well as academics and scholars of Freud psychoanalytic studies the history of science and the history of Europe *Light Pollution Handbook* Kohei Narisada, Duco Schreuder, 2013-06-05 This book deals with light pollution and about the ways to reduce it Light pollution is one of the negative side effects of artificial outdoor lighting The term light pollution is an unhappy one but as no better

alternative seems to exist it will be used throughout this book The function of all outdoor lighting is to enhance the visibility or the aesthetics in the nighttime environment The light should come where it is needed If not it is spilled causing economic and environmental losses as well as disturbance and discomfort The overall effects are termed light pollution a major form of light pollution is the glow extending over the night sky Sky glow is discussed in many astronomical textbooks and in many popular brochures The present book is primarily aimed at those responsible for outdoor lighting installations Thus an engineering approach has been chosen The level of the book is that of college or University level The book is organized in two parts The first seven chapters cover the areas of general interest and conclude with recommendations The second part deals with the scientific and engineering elaboration of the first part A number of examples are included that refer to specific outdoor lighting installations and projects that are directly related to the reduction of light pollution Finally some information is given about the authors
