The Impact of Uniform Laws on the Protection of Cultural Heritage and the Preservation of Cultural Heritage in the 21st Century Toshiyuki Kono, 2010-07-07 Since Emer de Vattel's 1714/1767 pioneering work on the importance of the protection of cultural property in the interests of mankind and human society international law has broadened the scope and strengthened protection in these areas. However it is the work of UNESCO and its original mission of producing international instruments that has in recent years enhanced the protection and safeguarding of various types of cultural heritage. Providing an overview of the seven Conventions with the two Protocols adopted by UNESCO and UNIDROIT this book offers comparative analysis of legal schemes for the protection or safeguarding of cultural heritage in 15 countries. This is the publication of the reports presented at the First Intersessional Thematic Congress of the International Academy of Comparative Law in November 2008.

Enforcement of Intellectual Property Rights in Dutch, English and German Civil Procedure George Cumming, Mirjam Freudenthal, 2008-10-21 EU Directive 2004/48/EC obliges Member States to seek to achieve partial harmonization of the remedies procedures and measures necessary to enforce intellectual property law. These obligations provide what may be termed a minimum standard which must be fulfilled by the Member States in the course of their implementation of the Directive. However the Directive is not faring well at the Member State level. The three authors' vastly detailed article by article analysis of the fortunes of Directive 2004/48/EC in three EU jurisdictions offers enormously valuable insights into the complex ways Member States respond to Community law and in so doing provides an important addition to the ongoing inquiry into the nature of the reciprocal tensions between EU law both judicial and legislative and the laws of Member States. The particular investigation undertaken here reveals three paradigmatic situations: the situation in which the Directive has not been implemented at all either because the Member State believes that its current legislation is adequate or that the wording of the Directive is such that no special legislation is required; England the situation in which implementation has been inadequate because either the pre-existing legislation constitutes inadequate legislation or because the specifically adopted legislation proves to be legally uncertain; The Netherlands and the situation in which the relevant time for implementation for the Directive has elapsed and no specific legislation has been adopted; Germany. If there really is as the European Commission contends an enforcement deficit in the protection of intellectual property rights by national rules of procedure then the most effective remedial approach Cummings shows is through the principles of legal certainty, full effect and effective judicial protection. These principles will assist the national court in interpretation of the precise meaning of the substantive obligations under the Directive. Drawing on the tenor of ECJ law that national procedural rules should not present an obstacle to adequate judicial protection the author considers the conditions that must be fulfilled before an eventual claimant who has suffered loss and damage caused by either the non implementation or the incorrect implementation of a directive may bring an action against the State for breach of Community law. The author presents his

analyses of the implementation of the Directive in Dutch and English national procedure and his proposals for German implementation as three separate cases rather than comparatively as any attempt to compare either the method of national implementation or the degree of adequacy or inadequacy inevitably obscures the essential particularities of each of the three national systems in relation to the Directive Although this book will repay the study of anyone interested in European law it will be of special value to practitioners and policymakers engaged in intellectual property law particularly in EU Member States

The History of Information Security Karl Maria Michael de Leeuw, Jan Bergstra, 2007-08-28 Information Security is usually achieved through a mix of technical organizational and legal measures These may include the application of cryptography the hierarchical modeling of organizations in order to assure confidentiality or the distribution of accountability and responsibility by law among interested parties The history of Information Security reaches back to ancient times and starts with the emergence of bureaucracy in administration and warfare Some aspects such as the interception of encrypted messages during World War II have attracted huge attention whereas other aspects have remained largely uncovered There has never been any effort to write a comprehensive history This is most unfortunate because Information Security should be perceived as a set of communicating vessels where technical innovations can make existing legal or organisational frame works obsolete and a breakdown of political authority may cause an exclusive reliance on technical means This book is intended as a first field survey It consists of twenty eight

contributions written by experts in such diverse fields as computer science law or history and political science dealing with episodes organisations and technical developments that may considered to be exemplary or have played a key role in the development of this field These include the emergence of cryptology as a discipline during the Renaissance the Black Chambers in 18th century Europe the breaking of German military codes during World War II the histories of the NSA and its Soviet counterparts and contemporary cryptology Other subjects are computer security standards viruses and worms on the Internet computer transparency and free software computer crime export regulations for encryption software and the privacy debate Interdisciplinary coverage of the history Information Security Written by top experts in law history computer and information science First comprehensive work in Information Security
