Buildings and Projects Herman Hertzberger, Arnulf Lüchinger, 1987 Overzicht van de in de periode 1959 1986 uitgevoerde werken ontwerpen en plannen van de Nederlandse architect 1932 [Lessons for Students in Architecture](#) Herman Hertzberger, 2001 Bewerkte compilatie van de stof behandeld in de colleges van de architect aan de Technische Universiteit Delft **Modern Schools** T. Hille, 2012-01-20 Modern Schools A Century of Design for Education is a comprehensive survey of modern K 12 schools from Frank Lloyd Wright to Morphosis an in depth design study that explores the fundamental relationship between architecture education and the design of contemporary learning environments Its focus is on the underlying design themes and characteristic features that support and enhance basic aspects of learning and in the process create an architectural expression that is both meaningful and lasting The breadth of its scope includes influences of contemporary educational ideas and practices related design concepts and strategies and most importantly the resulting impact of both on real environments for learning This remarkable survey and project study the first of its kind is an essential and important sourcebook for architects school planners educators and anyone else interested in contemporary school design The body of work presented which is international in scope underscores the unique architectural potential of this important project type and highlights design themes that remain fundamentally relevant for architects and designers today Presentation material includes more than 900 contemporary and historical photographs mostly in color and more than 200 detailed architectural plans drawings of schools by many of the outstanding design architects of the modern era Modern Schools A Century of Design for Education features the work of more than 60 architects worldwide including twentieth century masters Frank Lloyd Wright Alvar Aalto Marcel Breuer Le Corbusier and Eliel and Eero Saarinen as well as contemporaries such as Morphosis Coop Himmel b lau Behnisch Partners and Patkau Architects among many others

[Space and the Architect](#) Herman Hertzberger, 2000 This book complements Lessons for Students in Architecture published in 1991 It charts the background to Hertzberger s work of the last ten years and the ideas informing it drawing on a wide spectrum of subjects and designs by artists precursors past masters and colleagues [Encyclopedia of Twentieth Century Architecture](#) R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedie of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **Architecture an Inspiration** Ivor Smith, 2014-11-28 This book is about appreciation it is an attempt to explain what architecture essentially is rather than merely what it looks like Architecture an Inspiration is addressed to those who enjoy buildings cities and

landscapes and would like to have a deeper appreciation and a basis for their likes and dislikes A full appreciation demands careful observation and in these pages there are many explorations of this sort The book is divided into two parts the first is about the nature of architecture describing what is necessary The chapter headings define the basic requirements that to varying degrees must always be met such as facilitating activity moderating climate relating to context respecting materials and structure as well as conveying meaning and delight The second part is about the nature of designing and focuses on what the designer brings to the task to arrive at a human and poetic synthesis These different ways of thinking are elusive and not necessarily conscious they include the use of reason and intuition the value of experience and precedent the role of metaphor and the search for harmony For students this is difficult because there is no right way of designing So much of what is written about the architecture of today is negative that it seemed opportune to take a positive approach and point to work that is good now and in the past and reiterate some timeless qualities Architecture an Inspiration does not set out to be comprehensive Ivor Smith chooses examples that he finds particularly inspiring from the work of a few selected architects The book will appeal to those both interested in and studying architecture *Modern Architecture: A Critical History (Fifth) (World of Art)* Kenneth Frampton, 2020-09-08 An extensively revised and updated edition of a bestselling classic on modern architecture and its origins by Kenneth Frampton Kenneth Frampton's highly acclaimed survey of modern architecture and its origins has been a classic since it first appeared in 1980 Starting with the cultural developments since 1750 that drove the modern movement moving through the creation of modern architecture and exploring the effects of globalization and the phenomenon of international celebrity architects this book is the definitive history of modern architecture For this extensively revised and updated fifth edition of *Modern Architecture* Frampton added new chapters exploring the ongoing modernist tradition in architecture while also examining the varied responses to the urgent need to build more sustainably and create structures that will withstand changing climates This new edition features completely redesigned interiors and an updated and expanded bibliography making this volume more indispensable than ever **Place Between to Learn** Benjamin Michael Carlson, 1998 *The Buildings of Europe* Derek Fraser, 1996 This informative guide gathers together an essential collection of Berlin's most significant buildings drawn from the widest historical background with a bias towards modern architecture Each entry has a photograph name date address and architect *Adaptive Reuse in Architecture* Liliane Wong, 2023-05-08 Liliane Wong's latest volume on adaptive reuse in architecture presents 50 spectacular conversion and reuse projects worldwide including buildings such as the TWA Hotel at New York's John F Kennedy Airport the CaixaForum in Madrid and the New Museum in Berlin The projects are presented using a new classification system that addresses practitioners as well as academics The author's introductory essay provides a comprehensive overview and historical context for the enormous evolution and expansion of adaptive reuse over the past 50 years *New Architecture and Technology* Gyula Sebestyen, Christopher Pollington, 2007-06-07 Many books have covered the topics of architecture

materials and technology New Architecture and Technology is the first to explore the interrelation between these three subjects It illustrates the impact of modern technology and materials on architecture The book explores the technical progress of building showing how developments both past and present are influenced by design methods It provides a survey of contemporary architecture as affected by construction technology It also explores aspects of building technology within the context of general industrial social and economic developments The reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design

Studies in Tectonic Culture Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present Kenneth Frampton's long awaited follow up to his classic *A Critical History of Modern Architecture* is certain to influence any future debate on the evolution of modern architecture *Studies in Tectonic Culture* is nothing less than a rethinking of the entire modern architectural tradition The notion of tectonics as employed by Frampton the focus on architecture as a constructional craft constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism and suggests a convincing alternative Indeed Frampton argues modern architecture is invariably as much about structure and construction as it is about space and abstract form Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret Wright Kahn Scarpa and Mies and shows how both constructional form and material character were integral to an evolving architectural expression of their work Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole This is especially evident in his consideration of the work of Perret Mies and Kahn and the continuities in their thought and attitudes that linked them to the past Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant garde A copublication of the Graham Foundation for Advanced Studies and The MIT Press

The Handbook of Interior Architecture and Design Graeme Brooker, Lois Weinthal, 2013-10-24 The Handbook of Interior Architecture and Design offers a compelling collection of original essays that seek to examine the shifting role of interior architecture and interior design and their importance and meaning within the contemporary world Interior architecture and interior design are disciplines that span a complexity of ideas ranging from human behaviour and anthropology to history and the technology of the future Approaches to designing the interior are in a constant state of flux reflecting and adapting to the changing systems of history culture and politics It is

this process that allows interior design to be used as evidence for identifying patterns of consumption gender identity and social issues The Handbook of Interior Architecture and Design provides a pioneering overview of the ideas and arrangements within the two disciplines that make them such important platforms from which to study the way humans interact with the space around them Covering a wide range of thought and research the book enables the reader to investigate fully the changing face of interior architecture and interior design while offering questions about their future trajectory

The Material Imagination Matthew Mindrup, 2016-03-03 In recent years architectural discourse has witnessed a renewed interest in materiality under the guise of such familiar tropes as material honesty form finding or digital materiality Motivated in part by the development of new materials and an increasing integration of designers in fabricating architecture a proliferation of recent publications from both practice and academia explore the pragmatics of materiality and its role as a protagonist of architectural form Yet as the ethos of material pragmatism gains more popularity theorizations about the poetic imagination of architecture continue to recede Compared to an emphasis on the design of visual form in architectural practice the material imagination is employed when the architect thinks matter dreams in it lives in it or in other words materializes the imaginary As an alternative to a formal approach in architectural design this book challenges readers to rethink the reverie of materials in architecture through an examination of historical precedent architectural practice literary sources philosophical analyses and everyday experience Focusing on matter as the premise of an architect's imagination each chapter identifies and graphically illustrates how material imagination defines the conceptual premises for making architecture

Contemporary Architects Muriel

Emanuel,2016-01-23 **Norman Foster : Foster Associates ; buildings and projects. 3. 1978 - 1985** Norman Foster,1989 **The Ecologies of the Building Envelope** Alejandro Zaera-Polo,Jeffrey Anderson,2021-05-11 The Ecologies of the Envelope theorizes the building envelope as a literal embodiment of the social political technological and economic contingencies which have become embedded within it over the last century analyzing the historical lineages heroes and villains that helped define the complex material ecologies we see within the envelope today While the fa ade is one of the most thoroughly theorized elements of architecture it is also one of the most questioned since the end of the 19th century Within the discipline of architecture the traditional understanding of the fa ade focuses primarily on semiotic and compositional operations such as proportional laws and linguistic codes which are deployed on the building s surface In contrast to this our material and environmental theory of the envelope proposes that the exponential development of building technologies since the mid 19th century coupled with new techniques of management and regulation have diminished the compositional and ornamental capacities of the envelope in favor of material quantitative and technical performances Rather than producing a stylistic analysis of the fa ade we investigate the historical lineages of the performances components assembly types and material entanglements that constitute the contemporary building envelope **Time-based Architecture** Bernard Leupen,René Heijne,Jasper van Zwol,2005 This study is part of the project Context and Modernity at the Faculty of Architecture Delft University of Technology
