than the company's gasoline V 6 when introduced and in 1982 fuel economy was a major factor in many people's buying decisions. Fast forward to the late 1990s General Motors decided it needed a clean slate in its diesel designs to keep up with the Cummins and Power Stroke engines being offered by the competition. To accomplish this General Motors partnered with Isuzu to create a brand new diesel engine that would be the first high pressure common rail direct injection powerplant to hit the US vehicle market. The initial engine was produced at the newly built plant in Moraine, Ohio on July 17, 2000. Now 21 years after the joint venture DMAX Ltd was created in 1998, more than 2 million Duramax engines have been built. Until the introduction of the Duramax, GM's all-iron indirect injected IDI 6.5L V 8 produced just 215 hp and 440 ft lbs of torque in its most powerful configuration. The new aluminum-headed 6.6L Duramax V 8 hit the market with 300 hp and 520 ft lbs of torque in its first configuration and it has gotten stronger with age while still meeting increasingly strict emissions requirements.
