1. *Journal of the American Medical Association*, 2000; 283: 2686-2692.

1. What is the purpose of the study?
The purpose of the study is to investigate the effect of a new teaching method on student performance in mathematics.

2. What is the research question?
The research question is: Does the new teaching method significantly improve student performance in mathematics compared to the traditional method?

3. What are the variables in the study?
The independent variable is the teaching method (traditional vs. new). The dependent variable is student performance in mathematics.

4. What is the hypothesis?
The hypothesis is that students who use the new teaching method will perform significantly better in mathematics than those who use the traditional method.

5. What is the significance of the study?
The significance of the study is that it aims to determine if the new teaching method is more effective than the traditional one, which could lead to improved educational outcomes.
