Narrative Development in a Multilingual Context Ludo Verhoeven, Sven Strömqvist, 2001-12-31 In this volume the results of a number of empirical studies of the development of narrative construction within a multilingual context are presented and discussed It is explored what operating principles underlie the process of narrative production in L1 and L2 Developmental relations between form and function will be studied across a broad range of functional categories such as temporality perspective connectivity and narrative coherence Moreover a variety of language contact situations is considered with broad variation in the typological distances between the languages in order to enable cross linguistic comparison The analysis of learner data in various cross linguistic settings may thus offer new information on the role of the structural properties of unrelated languages on the process of narrative acquisition In the present volume an attempt is also made to find out how transfer from one language to the other is facilitated Finally the effects of input on narrative construction in children s first and second language are examined in several studies
