Of Literature and Knowledge Peter Swirski, 2007-02-12 Of Literature and Knowledge looks like an important advance in this new and very important subject literature is about to become even more interesting Edward O Wilson Pellegrino University Professor Harvard University Framed by the theory of evolution this colourful and engaging volume presents a new understanding of the mechanisms by which we transfer information from narrative make believe to real life Ranging across game theory and philosophy of science as well as poetics and aesthetics Peter Swirski explains how literary fictions perform as a systematic tool of enquiry driven by thought experiments Crucially he argues for a continuum between the cognitive tools employed by scientists philosophers and scholars or writers of fiction The result is a provocative study of our talent and propensity for creating imaginary worlds different from the world we know yet invaluable to our understanding of it Of Literature and Knowledge is a noteworthy challenge to contemporary critical theory arguing that by bridging the gap between literature and science we might not only reinvigorate literary studies but above all further our understanding of literature

Gordon, 2019-03-01 In Fieldnotes from a Depth Psychological Exploration of Evil Robin L. Gordon presents an accessible account of an attempt to define and understand the nature of evil. Gordon takes on the role of guide to this confusing land, tying together threads of Jungian theory, philosophy, etymology, neuroscience, and history as we are led on a personal journey of discovery. Gordon begins by analysing what a twelfth-century meeting between Chinggis Khan and Taoist priest Ch'ang Ch'un can tell us about the presence of opposing traits and the nature of evil in human beings. We learn what depth psychology has said about evil and the shadow part of our psyches and examine examples of human behaviour throughout history to understand the etymological, philosophical, and historical understandings and definitions of evil. Gordon's own relationship with her work and the feelings that arise when researching the psychological framework of Nazi doctors' genocide in Rwanda, Bosnia, and Syria, and the functionality of serial killers are interrogated. We then return to Chinggis Khan's and Ch'ang Ch'un's relationship, attempting to build a real and practical definition of evil and assessing their dialogues as a metaphor for Jung's views of the transcendent function. Fieldnotes from a Depth Psychological Exploration of Evil will be essential reading for academics and students of Jungian and post-Jungian studies, sociology, criminology, and philosophy. It will also be a key resource for Jungian analysts and psychotherapists interested in the study of evil and its impact on society and the psyche, as well as anyone investigating and redefining their own meanings of evil past and present.

Creative Thinkering Michael Michalko, 2011-08-31 Why isn't everyone creative? Why doesn't education foster more ingenuity? Why is expertise often the enemy of innovation? Bestselling creativity expert Michael Michalko shows that in every field of endeavor, from business and science to government, the arts, and even day-to-day life, natural creativity is limited by the prejudices of logic and the structures of accepted categories and concepts. Through step-by-step exercises, illustrated strategies, and inspiring real-world examples, he shows readers how to liberate their thinking and literally expand their imaginations by learning to synthesize dissimilar subjects, think paradoxically, and enlist the help of the subconscious mind. He also reveals the attitudes and approaches that diverse geniuses share, and anyone can emulate. Fascinating and fun, Michalko's strategies facilitate the kind of lightbulb-moment thinking that changes lives for the better.

Paton,2014-12-22 Is there a secret that some people seem to know about and use in creating lives that are overflowing with
success and abundance The answer is absolutely yes Over the years its been proven beyond a shadow of a doubt and yet
surprisingly it remains a mystery to most to this very day We are the consequences of our environment and although we may
not recognize the underlying forces influencing our lives each day the fact is we are all playing a rolefor the most part
unconsciouslyin creating the outcomes that make up our lives Our thoughts create our feelings our feelings create our
actions and our actions create our outcomes Indirectly yet surely we alone are ultimately responsible for the outcomes of our
lives through the thoughts we have chosen to emotionally connect with The silver lining is that we also all have within our
reach the ability to directly create new outcomes for a future that is limited only by the thoughts we choose from this day
forward Only through learning how to consistently make constructive thought choices can we begin to make a difference in
our lives and in the lives of those around us Join me on a personal journey learning the so called secrets and making them
