*Analytics and Intuition in the Process of Selecting Talent* Jürgen Deters, 2022-11-07 Human decisions especially in management and personnel selection are based on making judgments about people analytically and intuitively Yet in business and scientific contexts judgments are expected to be based on a rational analysis rather than intuitions or emotions Intuition is often seen as something mystical that should not be trusted and thus eliminated from human decision making Our empirical and theoretical research shows that this is impossible when people are dealing with people Instead intuitions and emotions have significant power in the decision

making process Neuroscience even shows that humans are incapable of switching off their emotions or intuitions when making decisions Therefore intuition and emotions as evolutionary achievements of human beings should be looked at more closely to use the wisdom they offer This book provides an insight into the current state of research on rational analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics By integrating scientifically verifiable rational analytical decision making procedures with the inner experiential knowledge of people this book bridges two complementary ways of recognizing and making good decisions It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational analytical and intuitive emotional selection procedures are successfully integrated by practitioners A Detailed Survey On Religiosity And Paranormal Experiences JACKSAN JUDAN FERNANDES,2020-10-24 This study is about people in their formative years It is about their beliefs and practices It is about their personality and how it relates to their beliefs It involves empirical investigation of 1800 college going men 882 and women 918 with an average age of about 20 years The subjects are predominantly Hindu 85% with 12% Christian and 3% Muslim student attending colleges in Visakhapatnam urban area Data were collected from them using the Myers Briggs Type Indicator MBTI and the two specially developed questionnaires that survey religiosity and paranormal beliefs and experiences Paranormal beliefs and experiences surveyed included sacred as well as secular beliefs experiences and practices While several studies in the West attempted to explore the relationships between personality paranormal beliefs and religious practices and experiences there are hardly any investigations in non Judeo Christian cultures The present study can help by throwing light on the cross cultural relevance of these findings
