the threat first annual report to the President and the Congress of the Advisory Panel to Assess Domestic Response Capabilities for Terrorism Involving Weapons of Mass Destruction , The Future of Terrorism John Horgan,Max Taylor,2013-01-11 These papers from a meeting on terrorism in Cork in 1999 include the effects of changing geo politics on terrorism strategic and tactical responses to innovations in terrorism the changing nature of terrorism the threat of weapons of mass destruction and single issue terrorism *Counter-Terrorism Technologies* Peter Lehr,2018-07-10 This book critically discusses the role of technology for counter terrorism in general and for securing our vulnerable open societies in particular It is set against the backdrop of the terrorist threat posed by the combined forces of Al Qaeda and ISIS Daesh in the foreseeable future The book commences by illuminating current and foreseeable tactics and weapons used by these implacable enemies weapons that may well include chemical biological radiological and potentially even nuclear CBRN devices In a second part it introduces technologies already available or in development that promise an increase in safety and security when it comes to the dangers posed by these terrorists This part also includes a critical discussion of advantages and disadvantages of such technologies that are quite often sold as a silver bullet approach in the fight against terrorism Controversies such as those triggered by the abuse of millimeter wave scanners deployed at several Western European airports will demonstrate that there are costs involved with regard to human rights The third analytical part takes the critical discussion further by arguing that the uncritical fielding of new surveillance and control technologies in parallel with the on going outsourcing and privatization of key services of the state could well lead to dystopias as envisaged in a rather prescient way by the so called cyperepunk novels of the 1980s The book concludes with the question that any liberal democracy should

ask itself how far can we go with regard to hardening our societies against terrorist threats Religion and Contemporary Politics Timothy J. Demy, Jeffrey M. Shaw Ph.D., 2019-09-19 With respect to the countries of the world this work addresses two basic questions How does religion affect politics in this country and How does politics affect religion in this country Although there are many books on the topics of religion and politics reference works that consider the two together are few with those that do exist primarily addressing theory rather than trends The present work does the latter contextualizing them within regional and national boundaries In so doing it recognizes the power of political and religious ideas and movements on individuals communities and nations making the work a valuable resource for several disciplines among them political science international relations religion and sociology The work focuses on the interplay of religion and politics in countries around the world with an emphasis on the post 2000s It is organized by global geographic regions including Africa Central and South America and the Middle East and presents countries alphabetically within those sections Each region has a brief overview of the political religious dynamics of the area so readers can compare and contrast the dynamics between and among countries in a region The work also includes an introduction sidebars and a bibliography *Countering Terrorism and Insurgency in the 21st Century* James J. F. Forest, 2007-06-30 The attacks of September 11 2001 inaugurated a new global era of counterterrorism policy and activity led by the United States Countering Terrorism and Insurgency in the 21st Century analyzes the most significant dimensions of combating terrorism including considerations of strategic and tactical issues hard power soft power and counterintelligence the need to thwart sources and facilitators weak governments ill conceived foreign policy and trafficking in drugs guns and humans and the incorporation of lessons learned thus far from combating terrorism around the globe Since the dawn of the new millennium combating terrorism has become a primary focus of security professionals throughout the world The attacks of September 11 2001 inaugurated a new global era of counterterrorism policy and activity led by the United States while many countries from Algeria and Spain to Sri Lanka and Indonesia have redoubled their efforts to combat their own indigenous terrorism threats In the United States the counterterrorism goals identified in the National Strategy for Combating Terrorism 2006 can only be achieved through significant multinational cooperation These goals are to advance effective democracies as the long term antidote to the ideologies of terrorism to prevent attacks by terrorist networks to deny terrorists the support and sanctuary of rogue states to deny terrorists control of any nation they would use as a base and launching pad for terror and to lay the foundations and build the institutions and structures we need to carry the fight forward against terror and help ensure our ultimate success At this point in the development of the global counterterrorism efforts it is particularly important to pause for reflection on a number of critical questions What do we know about effectively countering terrorism What are the characteristics of successful or unsuccessful counterterrorism campaigns What do we need to learn in order to do this better Countering Terrorism and Insurgency in the 21st Century addresses these and related questions contributing to national security policy

as well as to our understanding of the terrorist threat and how it can be defeated Volume 1 Strategic and Tactical Considerations examines issues of hard power soft power and intelligence counterintelligence Volume 2 Sources and Facilitators covers state failure border controls democracy promotion networks and trade and trafficking and societal issues Volume 3 Lessons Learned from Combating Terrorism and Insurgency includes case studies of counterterrorism operations e g the hijacking of the Achille Lauro the 1993 bombing of the World Trade Center and the capture of key terrorist suspects like Ramzi Youssef and Khalid Sheikh Mohamad and case studies of long term efforts to combat terrorism e g the Basques in Spain the Tamil Tigers in Sri Lanka Israel s struggle against Palestinian terror organizations Peru and Sendero Luminoso and Japan and Aum Shinrikyo **Japan - Restless Competitor** Dr Malcolm Trevor, Malcolm Trevor, 2013-12-16 In this important new and controversial study about the nature and focus of the Japanese economic agenda the author argues forcefully that the official mind set of leading bureaucrats top politicians and big business makes it virtually impossible for the western industrialized world to do business on an equal footing Put simply it is a question of western free market economics facing Japanese economic nationalism which is by its very nature both an expansive and a protectionist ideology International observers continue to ask is Japan changing or more forcefully is Japan capable of change Notions of reform and restructuring are today part of the Japanese lexicon but appear to hold little substance Trevor argues that any western notion of Japan changing fundamentally i e adopting western or Anglo Saxon philosophies is facile completely unrealistic This book is for everyone who wonders what motivates Japan s politico economic system and whether it is changing

Unconventional Weapons and International Terrorism Magnus Ranstorp, Magnus Normark, 2009-01-13 In recent years senior policy officials have highlighted increased signs of convergence between terrorism and unconventional CBRN weapons Terrorism now involves technologies available to anyone anywhere anytime deployed through innovative solutions This indicates a new and more complex global security environment with increasing risks of terrorists trying to acquire and deploy a CBRN Chemical Biological Radiological Nuclear attack This book addresses the critical importance of understanding innovation and decision making between terrorist groups and unconventional weapons and the difficulty in pinpointing what factors may drive violence escalation It also underscores the necessity to understand the complex interaction between terrorist group dynamics and decision making behaviour in relation to old and new technologies Unconventional Weapons and International Terrorism seeks to identify a set of early warnings and critical indicators for possible future terrorist efforts to acquire and utilize unconventional CBRN weapons as a means to pursue their goals It also discusses the challenge for intelligence analysis in handling threat convergence in the context of globalisation The book will be of great interest to students of terrorism studies counter terrorism nuclear proliferation security studies and IR in general **Globalisation and the New Terror** David Martin Jones, 2004-01-28 Examines trends in new terror understood here to be the capacity of sub state actors to secure religious or politically motivated objectives by violent means Argues that while the use of violence

to achieve political ends is scarcely original what distinguishes new terror is its potential for lethality Australian author

Fratricide in the Holy Land Avner Falk, 2005-02-17 This is the first English language book ever to apply psychoanalytic knowledge to the understanding of the most intractable international struggle in our world today the Arab Israeli conflict Two ethnic groups fight over a single territory that both consider to be theirs by historical right essentially a rational matter But close historical examination shows that the two parties to this tragic conflict have missed innumerable opportunities for a rational partition of the territory between them and for a permanent state of peace and prosperity rather than perennial bloodshed and misery Falk suggests that a way to understand and explain such irrational matters is to examine the unconscious aspects of the conflict He examines large group psychology nationalism group narcissism psychogeography the Arab and Israeli minds and suicidal terrorism and he offers psychobiographical studies of Ariel Sharon and Yasser Arafat two key players in this tragic conflict today
