Homeland Security Intelligence:

Homeland Security Intelligence Mark A. Randol, 2010-02 Prior to 9/11 it was possible to make a distinction between domestic intelligence law enforcement info collected within the U.S. and foreign intelligence military political and economic intelligence collected outside the country. Today threats posed by terrorist groups are now national security threats. This report provides a conceptual model of how to frame HSINT including geographic structural statutory and holistic approaches. The report argues that there is in effect a Homeland Security Intelligence Community. State and local leaders believe there is value to centralizing intelligence gathering and analysis in a manner that assists them in preventing and responding to local manifestations of terrorist threats to their people infrastructure and other assets. Security Intelligence Enterprise Mark A. Randol, 2010-11 A primary mission of the Dept of Homeland Security DHS is to prevent terrorist attacks within the U.S., reduce the vulnerability of the U.S. to terrorism and minimize the damage and assist in the recovery from terrorist attacks that do occur in the U.S. Since its inception DHS has had an intelligence component to support this mission. Following a reorganization of the DHS in 2005 a strengthened Office of Intelligence and Analysis I border security critical infrastructure protection and sharing of info with state local and private sector partners.

Homeland Security Intelligence James E. Steiner, 2014-07-06 Homeland Security Intelligence is the first single authored comprehensive treatment of intelligence. It is geared toward the full range of homeland security practitioners which includes hundreds of thousands of state and local government and private sector practitioners who are still exploring how intelligence can act as a force multiplier in helping them achieve their goals. With a focus on counterterrorism and cyber security author James E. Steiner provides a thorough and in depth picture of why intelligence is so crucial to homeland security missions who provides intelligence support to which homeland security customer and how intelligence products differ depending on the customer's specific needs and duties. **The Department of Homeland Security Intelligence**

Enterprise, 2009 Prepared for Members and Committees of Congress. The Department of Homeland Security Intelligence Enterprise Summary. The primary mission of the Department of Homeland Security DHS the Department is to prevent terrorist attacks within the United States, reduce the vulnerability of the United States to terrorism and minimize the damage and assist in the recovery from terrorist attacks that do o. The Homeland Security Act of 2002 assigned the original DHS intelligence component the Directorate of Information Analysis and Infrastructure Protection with responsibility to receive analyze and integrate law enforcement and intelligence information in order to A identify and assess the nature and scope of terrorist threats to the homeland B detect and identify threats of terrorism again. Congressional Research Service 2 The Department of Homeland Security Intelligence Enterprise He also set five priorities: Improving the quality of intelligence analysis across the department integrating the DHS IE strengthening support to state local and tribal authorities and the private sector ensuring that DHS IE takes its place in the IC and solidifying the relationship with the Congress. These include

Assessment,2010 **Homeland Security Intelligence** Mark A. Randol,2008 This report provides a potential conceptual model of how to frame HSINT including geographic structural statutory and holistic approaches Given that state local tribal and private sector officials play such an important role in HSINT the holistic model one not constrained by geography or levels of government strikes many as the most compelling The report argues that there is in effect a Homeland Security Intelligence Community HSIC Although the HSIC s members are diffused across the nation they share a common counterterrorism interest The proliferation of intelligence and information fusion centers across the country indicate that state and local leaders believe there is value to centralizing intelligence gathering and analysis in a manner that assists them in preventing and responding to local manifestations of terrorist threats to their people infrastructure and other assets At the policy and operational levels the communication and integration of federal HSINT efforts with these state and local fusion centers will likely remain an important priority and future challenge **Reassessing Homeland Security Intelligence: A Review of the DHS Office of Intelligence and Analysis** Christian Beckner,2022 **Department of Homeland Security Intelligence and Border Security** United States. Homeland Security Intelligence ,2006 Although the activities involved in homeland security intelligence HSINT itself are not new the relative importance of state local and private sector stakeholders the awareness of how law enforcement information might protect national security and the importance attached to homeland security intelligence have all increased substantially since the events of September 11 2001 There are numerous intelligence collection disciplines through which the U S Intelligence Community IC collects intelligence to support informed national security decision making at the national level and the allocation of tactical military and law enforcement resources at the local level The collection disciplines are generally referred to as those which fall within national technical means or nontechnical means Technical means include signals intelligence SIGINT measurement and signatures intelligence MASINT and imagery intelligence IMINT Non technical means include human intelligence HUMINT and open source intelligence OSINT Each of these collection disciplines is source specific that is a technical platform or human source generally managed by an agency or mission manager collects intelligence that is used for national intelligence purposes HSINT however is generally not source specific as it includes both national technical and non technical means of collection For example HSINT includes human intelligence collected by federal border security personnel or state and local law enforcement officials as well as SIGINT collected by the National Security Agency Reasonable individuals can differ therefore with respect to the question of whether HSINT is another collection discipline or whether homeland security is simply another purpose for which the current set of collection disciplines is being harnessed Homeland security information as statutorily defined pertains directly to 1 terrorist intentions and capabilities to

attack people and infrastructure within the United States and 2 U S abilities to deter prevent and respond to potential terrorist attacks This report provides a potential conceptual model of how to frame HSINT including geographic structural statutory and holistic approaches Given that state local tribal and private sector officials play such an important role in HSINT the holistic model one not constrained by geography or levels of government strikes many as the most compelling The report argues that there is in effect a Homeland Security Intelligence Community HSIC While this community may not necessarily be a useful construct from a management perspective it is nevertheless a community as traditionally defined Although the HSIC s members are diffused across the nation they share a common counterterrorism interest The proliferation of intelligence and information fusion centers across the country indicate that state and local leaders believe there is value to centralizing intelligence gathering and analysis in a manner that assists them in preventing and responding to local manifestations of terrorist threats to their people infrastructure and other assets At the policy and operational levels the communication and integration of federal HSINT efforts with these state and local fusion centers will likely remain an important priority and future challenge This report will not be updated

DHS Intelligence Analysis ,2014 DHS plays a vital role in securing the nation and its intelligence analysis capabilities are a key part of this effort Within DHS I A has a lead role for intelligence analysis but other operational components also perform their own analysis activities GAO was asked to review the management of departmental analysis efforts This report addresses the extent to which 1 DHS intelligence analysis activities are integrated to support departmental intelligence priorities 2 I A customers find analytic products and services useful and 3 I A has addressed challenges in maintaining a skilled analytic workforce GAO examined mechanisms DHS used to coordinate analysis across components I A reports and feedback surveys and human capital plans GAO also interviewed officials from I A the five DHS components with intelligence analysis as a core function the Office of the Director of National Intelligence who represent the Intelligence Community 7 of 78 fusion centers focal points within states that analyze and share information and the private sector The fusion center and sector interviews chosen based on geographic location and other factors are not generalizable but provided insight on progress GAO recommends among other things that DHS 1 establish strategic intelligence priorities and use them to inform analytic activities and 2 establish mechanisms to evaluate workforce initiatives and use results to determine any needed changes
