Sound, Sense, and Rhythm Mark W. Edwards, 2009-01-10 This book concerns the way we read or rather imagine we are listening to ancient Greek and Latin poetry Through clear and penetrating analysis Mark Edwards shows how an understanding of the effects of word order and meter is vital for appreciating the meaning of classical poetry composed for listening audiences The first of four chapters examines Homer's emphasis of certain words by their positioning a passage from the Iliad is analyzed and a poem of Tennyson illustrates English parallels The second considers Homer's techniques of disguising the break in the narrative when changing a scene's location or characters to maintain his audience's attention In the third we learn partly through an English translation matching the rhythm how Aeschylus chose and adapted meters to arouse listeners' emotions The final chapter examines how Latin poets particularly Propertius infused their language with ambiguities and multiple meanings An appendix examines the use of classical meters by twentieth century American and English poets Based on the author's Martin Classical Lectures at Oberlin College in 1998 this book will enrich the appreciation of classicists and their students for the immense possibilities of the languages they read translate and teach Since the Greek and Latin quotations are translated into English it will also be welcomed by non classicists as an aid to understanding the enormous influence of ancient Greek and Latin poetry on modern Western literature

Creative Classical Translation Paschalis Nikolaou, 2023-12-07. This Element surveys transmissions of ancient Greek and Latin texts into anglophone literatures often straddling boundaries between translational responsibility and adaptive re-creative textual practices. Attention to manifestations of and reasons for versioning, retranslation, hybridity and translation as experiment compels an introductory discussion of evolving tendencies of classical reception with particular dispositions relating to a sociocultural context such as that of the United States observed in Section 3. The role paratexts play in the dialogue between scholarship, literary art and performance is the focus of Section 4 while Section 2 presents readers with a range of English responses to Homer. Creativity through sites and positions of translation is a defining feature of the workings of literary traditions and of antiquity and modernity in constant dialogue. This Element explores numerous textual manifestations and reasons for invention along with integrations of thinking on classical translation over the centuries helping shape present day translation studies.

Children's Literature Seth Lerer, 2009-04-01. Ever since children have learned to read there has been children's literature. Children's Literature charts the makings of the Western literary imagination from Aesop's fables to Mother Goose from Alice's Adventures in Wonderland to Peter Pan from Where the Wild Things Are to Harry Potter. The only single volume work to capture the rich and diverse history of children's literature in its full panorama, this extraordinary book reveals why J.R.R. Tolkien, Dr. Seuss, Laura Ingalls Wilder, Beatrix Potter and many others, despite their divergent styles and subject matter, have all resonated with generations of readers. Children's Literature is an exhilarating quest across centuries, continents and genres to discover how and why we first fall in love with the written word. Lerer has accomplished something magical. Unlike the many handbooks to children's literature that synopsise, evaluate or otherwise guide adults in the selection of materials for children, this work presents a true critical history of the genre. Scholarly, erudite and all but exhaustive, it is also entertaining and accessible. Lerer takes his subject seriously without making it dull. Library Journal starred review. Lerer's history reminds us of the wealth of literature written during the past 2,600 years. With his vast and multidimensional knowledge of literature, he underscores the vital role it plays in forming a child's imagination. We are made, he suggests, by the books we read.
