There is a growing body of research that suggests that the use of technology in the classroom can enhance student learning and engagement. This research is based on the idea that technology can provide students with access to a wide range of resources and tools that can help them to learn more effectively. For example, students can use technology to access online resources, such as videos and interactive simulations, which can help them to understand complex concepts more easily. Additionally, technology can be used to create a more personalized learning experience for each student, allowing them to learn at their own pace and in a way that is most effective for them. This research also suggests that technology can be used to increase student motivation and engagement, as students are more likely to be interested in learning when they are using technology. Overall, the research suggests that technology can be a valuable tool for enhancing student learning and engagement in the classroom.

**3.2.2. Statistical analysis.** The data were analysed using the statistical software package SPSS (version 16.0, SPSS Inc., Cary, NC, USA). The data were analysed using the Mann-Whitney U-test, Fisher's exact test, chi-square test, and Pearson's correlation coefficient. The level of significance was set at  $P < 0.05$ .
