terrific Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks at attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

Tony Royle, 2004-08-02 The McDonald's Corporation is not only the largest system-wide sales service in the world, it is a phenomenon in its own right and is now recognized as the most famous brand in the world. By providing a detailed analysis of the extent to which the McDonald's Corporation adapts or imposes its labour relations policies in Europe, this volume represents a real-life case study revealing the interaction between a global multi-national enterprise and the regulatory systems of a number of different European countries. Key features include an overview of the McDonald's Corporation's development and structure; an analysis of its corporate culture and the issues of franchising; an examination of key union strategies including systems of co-determination, consultation and collective bargaining; a chapter dealing specifically with European legislation, in particular the McDonald's European Works Council. The author systematically analyzes the conflict between the McDonald's Corporation and the industrial relations systems of the European countries within which it operates and exposes this conflict as an unequal struggle between economic liberalism and collectivism.
