Meek, Ulf

Zimmermann, 2017-09-29 Initiated and governed by property or business owners under the authorization of state and local

governments business improvement districts (BIDs) have received a very mixed reception. To some they are innovative examples of self governance and public private partnerships; to others they are yet another example of the movement toward the privatization of what should be inherent government responsibilities. Among the first books to present a collection of scholarly work on the subject, *Business Improvement Districts: Research, Theories, and Controversies* brings together renowned leaders in the field to compile the highest quality theoretical, legal, and empirical studies into one comprehensive volume. Investigating fundamental concerns at the core of the debate as well as potential solutions, this groundbreaking resource tackles the need for improved problem solving and efficiency in service delivery. Examines new and innovative policy tools for both the public and private sectors. Evaluates whether BIDs do ignore the needs and voices of residential property owners. Discusses the challenge created by social segregation in cities. Addresses lack of accountability by BIDs to the public and elected representatives. From different perspectives, leading practitioners and academics analyze the pros and cons of BIDs both in the United States and around the world. They look at their impact on urban planning and retail revitalization, consider their legal implications, and explore ways to measure BID performance. Filled with case studies of urban centers including San Diego, Atlanta, New York, Toronto, and Capetown, and state models such as New Jersey and Pennsylvania, this examination brings together essential information for researchers as well as those leaders and policy makers looking to adopt a BID model or improve one already in place.

Empowering Public Administrators Amanda M. Olejarski, Sue M. Neal, 2024-02-06. Public administrators need to be empowered to make difficult decisions. Acting in the public interest often means doing what is ethical, even when it is an unpopular choice. Yet too often public servants at the local, state, and federal levels internalize the notion that their hands are tied and that they are limited in their ability to effect change. *Empowering Public Administrators: Ethics and Public Service Values* provides a much needed antidote to inaction, offering a new lens for viewing administrative decision making and behavior. This book makes a case for bringing historically significant theories to the forefront of public service ethics by applying them to a series of current ethical challenges in practice. Exploring administrative discretion as modern bureaucrats govern public affairs in a political context, this collection builds on the normative foundations of public administration and provides readers with a scaffold for understanding and practicing public service values. Questions for discussion and applications to practice are included in each chapter, making this collection of interest to public affairs masters and doctoral students as well as public service practitioners.
