Risk Management Practices in Construction

Ayodeji E. Oke, Pelumi E. Adetoro, Seyi S. Stephen, Clinton O. Aigbavboa, Lukman O. Oyewobi, Douglas O. Aghimien, 2023-07-26

This volume describes risk management practices in the construction industry in selected countries with an emphasis on developing countries and how these countries can learn from the practices in more developed ones Risk management in the construction industry can be difficult to understand due to the various complex procedures that are involved and to the unique concerns and contexts associated with each project The industry has been a key contributor to the economic and social development of many countries of the world and is increasingly incorporating sustainability into its practices However it is plagued by various risks that can affect the quality cost time and overall sustainability of projects Therefore there is need to effectively manage risk in order to ensure timely completion of construction projects in good quality and within budget which in turn results in more efficient and often more sustainable practices The book is divided into four parts The first section features a primer on risk management practices as they pertain to the construction industry The second part dives in to describe risk management in selected developing countries including Malaysia Qatar Saudi Arabia South Africa Sri Lanka and Tanzania as well as the city of Hong Kong The third section describes the construction risk management practices of a selection of more developed countries with known risk management institutes and established practices of risk management These countries include Australia Canada Sweden and United States of America The fourth part offers a general overview of the definition concepts and process of risk management based on reviewed literature It also discusses the benefits of effective risk management to clients and to project teams especially from the perspective of ensuring sustainability This last section also summarizes the risk management practices in both developing and developed countries for the purpose of improving the practices in the former by learning from the latter

Rethinking Enterprise Risk Management Halis

Kıral, 2024-12-17 This book provides a critical analysis of existing enterprise risk management models and practices and proposes innovative solutions to address the challenges associated with implementing enterprise risk management strategies Enterprise risk management activities are not high on the priority agenda of the senior management in both public and private sectors Conceptual ambiguity and methodological gaps in current standards and frameworks make it difficult to effectively implement enterprise risk management Therefore this book's approach to enterprise risk management aims to eliminate the unit based silo approach of traditional risk management adopting a function based silo approach It focuses on the management of fewer and more significant risks associated with high level objectives rather than all business processes of the organization thus increasing the success of enterprise risk management implementation The book would be a valuable read for business executives internal and external auditors business school students and academics

A Research Agenda

for Construction Management Roine Leiringer, Andy Dainty, 2023-07-01 This impressive book challenges the orthodoxies that have dominated the construction management research CMR field for the past 50 years Providing a comprehensive framework for understanding the complex and multi faceted domain of construction A Research Agenda for Construction Management sets out a range of alternative perspectives which problematise the axioms upon which much CMR knowledge is based and offers new directions for the research community to consider *A Handbook for Construction Project Planning and Scheduling* Virendra Kumar Paul, Chaitali Basu, 2018-02-07 The development of IS 15883 Part 2 2009 Construction Time Management Guidelines is an important milestone in formally recognizing the threshold framework for the construction industry This initiative of Bureau of Indian Standards BIS provides for a national framework for time management which specifically focuses on unique aspects of Indian construction industry This handbook supplements the BIS framework enshrined in IS 15883 Part 2 and thereby facilitating capacity building for widespread application of the Guidelines The chapters of handbook follow the stages of a typical project life cycle of a construction project flowing seamlessly from project inception through to project closure In addition latest trends in the construction sector in terms of tools techniques and software have also been elaborated It is implied that time management operates in conjunction with other interdependent processes of project management and might need multi dimensional decision making To that extent this handbook does elaborate the relevant interface that maybe critical for comprehensive project management approach As a primary expectation the handbook would serve as a supplementary textbook for students of architecture and civil engineering who are pursuing subjects in construction management It is also an effortless reference for new entrants to the field of project management and other management professionals as well who seek a quick reference to the tools and techniques of time management illustrated through examples in easy language
