AMERICAN EXPANSIONISM

(Pages 342–344)

Why did Americans support imperialism?

In 1893, **Queen Liliuokalani** of Hawaii gave up her throne. Hawaii was about to be taken over by the United States.

By the 1880s, many American leaders thought the United States should establish colonies overseas. This idea was called **imperialism**—the policy in which stronger nations extend economic, political or military control over weaker territories. European countries had competed for territory all over the world. Most Americans gradually accepted the idea of overseas expansion.

Three factors fueled American imperialism: desire for military strength,

thirst for new markets, and a belief in the superiority of American culture.

Admiral **Alfred T. Mahan** of the U.S. Navy supported growing American naval power so the U.S. could compete with other nations. The U.S. built such modern battleships as the *Maine* and the *Oregon*. The new ships made the U.S. the world's largest naval power.

By the late 1800s, technology had changed American farms and factories. They produced more than Americans could consume. So the U.S. needed foreign trade. American businesses needed markets for their products and raw materials for their factories.

The third root of American imperialism was a belief that the people of the United States were better than the people of other

product of any one individual's preferences but emerge as a consequence of the way in which complex modern governments with large bureaucracies operate. Written with the interested layperson in mind as well as students of international affairs, this Citizen's Guide to American Foreign Policy asks questions like: Why do presidents so often do things which seem to be directly against the national interests of the United States not just in retrospect but even at the time? Why do there seem to be so many fiascoes in US foreign policy? Why does Congress sometimes tie the hands of the president in foreign affairs? Why do presidents seem to respond more to opinion polls or to what's on CNN and Fox News than they do to the core interests of the United States? Houghton's overview helps us see past the partisan in fighting that too often obscures the central issues in foreign affairs. This is vital required reading for all readers who wish to better understand America's involvement in the world.

Unmasking Social Science Imperialism Mentan, Tatah, 2015-02-03. Contemporary social science is a product of the capitalist world system and Eurocentrism is constitutive of the geoculture of this system, characterized by the parochiality of its universalism assumptions about the superiority of Western civilization and imposition as the sole theory of global progress. The creation of these structures of knowledge, specifically the institutionalization of the social sciences, is a phenomenon that is inextricably linked to the very formation and maturation of Europe's capitalist world system or imperialism. There is therefore nothing that is natural, logical, or accidental about the institutionalization of the social sciences. These Europeanized structures of knowledge are imposed ways of producing knowledge of the world. This Eurocentrism of social science has justifiably come under increasingly vigorous scrutiny, especially in the period since 1945 with the formal decolonization of Africa, Asia, and much of the Caribbean. This book forcefully argues that if social science is to make any progress in the twenty-first century, it must overcome its Eurocentric heritage that has distorted social analyses and its capacity to deal with the problems of the contemporary world and embrace other non-Western funds of knowledge production.

Designs on Empire Andrew Priest, 2021-08-31 In the eyes of both contemporaries and historians the United States became an empire in 1898 By taking possession of Cuba and the Philippines the nation seemed to have reached a watershed moment in its rise to power spurring arguments over whether it should be a colonial power at all However the questions that emerged in the wake of 1898 built on long standing and far reaching debates over America's place in the world Andrew Priest offers a new understanding of the roots of American empire that foregrounds the longer history of perceptions of European powers He traces the development of American thinking about European imperialism in the years after the Civil War before the United States embarked on its own overseas colonial projects *Designs on Empire* examines responses to Napoleon III's intervention in Mexico Spain and the Ten Years War in Cuba Britain's occupation of Egypt and the carving up of Africa at the Berlin Conference Priest shows how observing and interacting with other empires shaped American understandings of the international environment and their own burgeoning power He highlights ambivalence among American elites regarding empire as well as the prevalence of notions of racial hierarchy While many deplored the way powerful nations dominated others others saw imperial projects as the advance of civilization and even critics often felt a closer affinity with European imperialists than colonized peoples A wide ranging book that blends intellectual political and diplomatic history *Designs on Empire* sheds new light on the foundations of American power
