Fundamentals of Board Busyness and Corporate Governance Vu Quang

Trinh, 2021-11-25 This book delivers the essential concepts and theoretical perspectives of corporate governance and board busyness. It uses the unique context of a dual banking system to capture the potential effects of such aspects on corporate outcomes. Board busyness refers to a board with a substantial proportion of busy members who hold multiple directorships. In most cases, directors are overboarded, which means that they hold an excessive number of seats across different boards. The busyness of individuals is gauged to infer their monitoring and recommending abilities through their involvement efforts, knowledge, skills, and experience, and hence their behaviour in financial contexts. Yet, an assessment of board busyness and its effects is challenging and inconclusive concerning the two opposing arguments surrounding this board attribute: reputation and busyness. The book is the first to thoroughly discuss this up-to-date concept within the dual banking system and is designed to help new researchers in this field and students boost their research and academic careers.

The journal's purpose is to publish thought-provoking articles that advance knowledge in the management accounting discipline and are of interest to both academics and practitioners.

Student Self-Assessment as a Process for Learning Zi Yan, 2022-08-08 Covering both higher education and school education, this book contributes to the field of assessment by providing a systematic account of student self-assessment based on a consistent conceptualisation. Yan advocates viewing self-assessment as an active and reflective process and using it as a learning strategy rather than an assessment method. He builds on a newly developed self-assessment model adopting a process perspective and synthesises a series of interrelated empirical investigations into the whole chain of student self-assessment research. The research encompassed in the volume spans from self-assessment practices and measurement through predictors of self-assessment, its interweaved relationship with self-regulated learning and feedback literacy, impact on student learning outcomes, to designing sustainable self-assessment interventions. The empirical evidence is from a wide range of current scholarship to ensure that the principles and implications conveyed are applicable internationally.

Policymakers, students, and scholars in educational assessment, educational psychology, and teaching and instruction will find the theoretical explorations and empirical investigations contained within useful to show how student self-assessment could be better conceptualised, researched, and practised.

Econometrics for Daily Lives, Volume II Tam Bang Vu, 2018-02-25 This volume deals with advanced topics and specific problems in applied econometrics. Part III introduces advanced topics in econometric theory and contains three chapters.
