to develop systems that prioritize high performance by focusing on cost cutting and maximizing profits instead of on preparedness elasticity and resource slack The consequences of this kind of organizational streamlining becomes evident only when the black swans loom The author discusses how individuals and society can develop the resilience needed to deal with these incidents He asserts that there are three central social mechanisms that can help us understand how social systems work and how they are interconnected time lag threshold value and feedback These three concepts can help us to understand how changes occur in non linear systems for instance how small changes at the micro level can lead to large changes at the macro level This book will be of interest to researchers academics and students in the fields of economics finance business and industry
