Analysis and Geometry of Metric Measure Spaces Galia Devora Dafni, Robert John McCann, Alina Stancu, 2013 This book contains lecture notes from most of the courses presented at the 50th anniversary edition of the Seminaire de Mathematiques

Superieure in Montreal This 2011 summer school was devoted to the analysis and geometry of metric measure spaces and featured much interplay between this subject and the emergent topic of optimal transportation In recent decades metric measure spaces have emerged as a fruitful source of mathematical questions in their own right and as indispensable tools for addressing classical problems in geometry topology dynamical systems and partial differential equations The summer school was designed to lead young scientists to the research frontier concerning the analysis and geometry of metric measure spaces by exposing them to a series of minicourses featuring leading researchers who highlighted both the state of the art and some of the exciting challenges which remain This volume attempts to capture the excitement of the summer school itself presenting the reader with glimpses into this active area of research and its connections with other branches of contemporary mathematics
