Environmental Audit Committee, 2009 In this report HC 243 session 2008-09 ISBN 9780215529220 the Environmental Audit Committee calls for a sector based universal labelling scheme comparable to those

emerging for food products The Committee says the Government should be prepared to legislate for such a scheme if necessary The Committee found greenwash the use of insubstantial or meaningless claims to promote a product to be a growing problem and that the Government has a role in policing green labels Commenting on the report Colin Challen MP Chairman of the Environmental Information Sub Committee said The Government has to act to deal with the problem of greenwash Clear labels are needed to help consumers make informed choices but for consumers to have confidence in them environmental labels must be backed up by independent monitoring that is fully verified Further that The proliferation of labels means we urgently need a universal scheme to help consumers discriminate between products on the basis of environmental factors A robust labelling regime would also change the way many businesses behave and help drive up environmental standards across whole sectors of the economy The Committee calls for more resources to be put into environmental labelling including efforts to raise public awareness It also wants more information to be made available on the standards and processes that underpin any label with the Government setting clear standards and guidelines on the content and presentation of such information In addition the Committee emphasises that the Government should encourage carbon labelling on all products as part of a universal sector based environmental labelling scheme
