Unhappy Union John Peet,Anton La Guardia,The Economist,2014-06-24 The euro was supposed to create an unbreakable bond between the nations and people of Europe But when the debt crisis struck the flaws of the half built currency brought the European Union close to breaking point after decades of post war integration Deep fault lines have opened up between European institutions and the nation states and often between the rulers and the ruled raising profound questions about Europe s democratic deficit Belief in European institutions and national governments alike is waning while radicals on both the left and the right are gaining power and influence Europe s leaders have so far proved the doomsayers wrong and prevented the currency from breaking up If the euro fails Europe fails says Angela Merkel Yet the euro and the European project as a whole is far from safe If it is to survive and thrive leaders will finally have to confront difficult decisions How much national sovereignty are they willing to give up to create a more lasting and credible currency How much of the debt burden and banking risk will they share Is Britain prepared to walk away from the EU And will other countries follow In *Unhappy Union* The Economist s Europe editor and Brussels correspondent provide an astute analysis of the crisis They describe America s behind the scenes lobbying to salvage the euro economists bitter debates over austerity the unseen maneuvers of the European Central Bank and the tortuous negotiations over banking union In the final chapter they set out the stark choices confronting Europe s leaders and citizens
