*Art as Information Ecology* Jason A. Hoelscher, 2021-08-09 In *Art as Information Ecology* Jason A Hoelscher offers not only an information theory of art but an aesthetic theory of information Applying close readings of the information theories of Claude Shannon and Gilbert Simondon to 1960s American art Hoelscher proposes that art is information in its aesthetic or

indeterminate mode information oriented less toward answers and resolvability than toward questions irresolvability and sustained difference These irresolvable differences Hoelscher demonstrates fuel the richness of aesthetic experience by which viewers glean new information and insight from each encounter with an artwork In this way art constitutes information that remains in formation a difference that makes a difference that keeps on differencing Considering the works of Frank Stella Robert Morris Adrian Piper the Drop City commune Eva Hesse and others Hoelscher finds that art exists within an information ecology of complex feedback between artwork and artworld that is driven by the unfolding of difference By charting how information in its aesthetic mode can exist beyond today's strictly quantifiable and monetizable forms Hoelscher reconceives our understanding of how artworks work and how information operates Nervous Systems Johanna Gosse, Timothy Stott, 2021-11-02 The contributors to *Nervous Systems* reassess contemporary artists and critics engagement with social political biological and other systems as a set of complex and relational parts an approach commonly known as systems thinking Demonstrating the continuing relevance of systems aesthetics within contemporary art the contributors highlight the ways that artists adopt systems thinking to address political social and ecological anxieties They cover a wide range of artists and topics from the performances of the Argentinian collective the Rosario Group and the grid drawings of Charles Gaines to the video art of Singaporean artist Charles Lim and the mapping of global logistics infrastructures by contemporary artists like Hito Steyerl and Christoph Bachel Together the essays offer an expanded understanding of systems aesthetics in ways that affirm its importance beyond technological applications detached from cultural contexts Contributors Cristina Albu Amanda Boetzkes Brianne Cohen Kris Cohen Jaimey Hamilton Faris Christine Filippone Johanna Gosse Francis Halsall Judith Rodenbeck Dawna Schuld Luke Skrebowski Timothy Stott John Tyson
