Historical And Curious Maps Agile Rabbit Editions:

The Agile Rabbit Book of Historical and Curious Maps, 2005 *Carte Geografiche Storiche E Singolari* Pepin van Roojen, 2005 The maps are entirely unannotated except for table of contents at end containing thumbnail images The maps are intended for use as a graphic resource or for inspiration *Designing Information* Joel Katz, 2012-08-20 The book itself is a diagram of clarification containing hundreds of examples of work by those who favor the communication of information over style and academic postulation and those who don't Many blurbs such as this are written without a thorough reading of the book Not so in this case I read it and love it I suggest you do the same Richard Saul Wurman This handsome clearly organized book is itself a prime example of the effective presentation of complex visual information eg magazine It is a dream book we were waiting for on the field of information On top of the incredible amount of presented knowledge this is also a beautifully designed piece very easy to follow Krzysztof Lenk author of *Mapping Websites Digital Media Design Making complicated information understandable* is becoming the crucial task facing designers in the 21st century With *Designing Information* Joel Katz has created what will surely be an indispensable textbook on the subject Michael Bierut Having had the pleasure of a sneak preview I can only say that this is a magnificent achievement a combination of intelligent text fascinating insights and oh yes graphics Congratulations to Joel Judith Harris author of *Pompeii Awakened A Story of Rediscovery* *Designing Information* shows designers in all fields from user interface design to architecture and engineering how to design complex data and information for meaning relevance and clarity Written by a worldwide authority on the visualization of complex information this full color heavily illustrated guide provides real life problems and examples as well as hypothetical and historical examples demonstrating the conceptual and pragmatic aspects of human factors driven information design Both successful and failed design examples are included to help readers understand the principles under discussion **Map Functions** Ewa Krzywicka-Blum, 2016-11-22 This book departs from typical cartography textbooks which tend to focus on the characteristics of the methods and means of expression Instead it offers an explanation of the individual perspective on the map as a specific product of civilization one that constitutes a component of social communication The layout highlights the essential property of cartographic notation namely the way of forming the map's content elements adjusted to its purpose This property is ensured thanks to the dimension of reference units in relation to the observation scale of the objects and by topological consistency between the reference units system and real layout of the objects An exploration of the characteristics of various ways of depicting a map's content elements organized in the reference units dimension is preceded by a general section accentuating the position of cartography among other sciences as well as the definition and general properties of a map The book's closing chapter includes a separate textbook overview of the applications of taxonomic methods in cartography *New Forms of Environmental Writing* Timothy C. Baker, 2022-05-19 Surveying a wide range of contemporary poetry fiction and memoir by women writers this book explores our most pressing environmental concerns and

shows how these texts find innovative new ways to respond to our environmental crisis Arguing for the centrality of individual encounter and fragmentary form in 21st century literature as well as themes of attention care and loss Baker highlights the ways that fragmentary texts can be seen as a mode of resistance These texts provide new ways to consider the role of individual agency and enmeshment in a more than human world The author proposes a new model of gleaning to encompass ideas of collection assemblage and relinquishment and draws on theoretical perspectives such as ecofeminism new materialism and posthumanism Examining works by writers including Sara Baume Ali Smith Elizabeth Jane Burnett Bhanu Kapil and Kathleen Jamie Baker provides important new insights into understanding our planetary predicament

Literary Invention and the Cartographic Imagination, 2022-10-24 Literary Invention and the Cartographic Imagination Early Modern to Late Modern is a wide ranging inter and transdisciplinary approach grounded in the twin rigors of theory and history which through close readings of authors from Edmund Spenser to Olga Tokarczuk and through considered discussions of the ideologies of walking and mapping in performance art and cultural representation assesses and analyses the significance of maps to literary texts and which examines the ways in which the literary maps imaginary and real worlds Together the essays demonstrate convincingly the close relationship between text map and culture Белорусское градостроительное искусство.
