Histories of the Future Susan Harding, Daniel Rosenberg, 2005-07-21 An anthropologically based interdisciplinary collection on sites and projections of imagined futures from conspiracy theorists to technological dystopias *Future Histories* Lizzie O'Shea, 2021-08-17 A highly engaging tour through progressive history in the service of emancipating our digital tomorrow Shortlisted for the Victorian Premier's Literary Award Australia When we talk about technology we always talk about tomorrow and the future which makes it hard to figure out how to even get there In *Future Histories* public interest lawyer and digital specialist Lizzie O'Shea argues that we need to stop looking forward and start looking backwards Weaving together histories of computing and progressive social movements with modern theories of the mind society and self O'Shea constructs a usable past that can help us determine our digital future What she asks can the Paris Commune tell us about earlier experiments in sharing resources like the Internet in common How can Frantz Fanon's theories of anti colonial self determination help us build digital world in which everyone can participate equally Can debates over equal digital access be helped by American revolutionary Tom Paine's theories of democratic economic redistribution What can indigenous land struggles teach us about stewarding our digital climate And how is Elon Musk not a future visionary but a steampunk throwback to Victorian era technological utopians In engaging sparkling prose O'Shea shows us how very human our understanding of technology is and how when we draw on the resources of the past we can see the potential for struggle for liberation for art and poetry in our technological present *Future Histories* is for all of us makers coders hacktivists Facebook users self styled Luddites who find ourselves in a brave new world **Future History** Kristina Bross, 2017 *Future History* analyzes English and American writings that imagine England on a global stage well before England became an empire or the United States became a global power Through close readings historical contextualization application of archival theory and careful speculation the work traces the ways that English and American writers imagined the East Indies and the West Indies as interconnected **A Future History of Water** Andrea Ballesterio, 2019-05-17 Focusing on Costa Rica and Brazil Andrea Ballesterio examines the legal political economic and bureaucratic history of water in the context of the efforts to classify it as a human right showing how seemingly small scale devices such as formulas and lists play large role in determining water's status **Big History and the Future of Humanity** Fred Spier, 2011-01-18 *Big History and the Future of Humanity* presents an original theoretical approach that makes big history the placing of the human past within the history of life the Earth and the Universe accessible to general readers while revealing insights into what the future may hold for humanity Provides an accessible and original overview of the entire sweep of history that places human history within the history of life the Earth and the Universe Features an original theory of big history which explains all of history and opens up an entirely new interdisciplinary research agenda Offers new insights into the future of humanity by better understanding the past Presents a new approach to complexity studies which takes into account the greatest galaxy clusters as well as the

tinest sub atomic particles *The Future History of Contemporary Chinese Art* Peggy Wang, 2021-01-26 A revelatory reclaiming of five iconic Chinese artists and their place in art history During the 1980s and 1990s a group of Chinese artists Zhang Xiaogang Wang Guangyi Sui Jianguo Zhang Peili and Lin Tianmiao ascended to new heights of international renown Even as their fame increased they came to be circumscribed by simplistic Western interpretations of their artworks as social and political critiques a perspective that privileged stories of dissidence over deep engagement with the art itself Through in depth case studies of these five artists Peggy Wang offers a corrective to previous appraisals demonstrating how their works address fundamental questions about the forms meanings and possibilities of art By the end of the 1980s Chinese artists were scrutinizing earlier waves of Western influence and turning instead to their own heritage and culture to forge their own future histories As the national trauma of the 1989 Tiananmen Square massacre converged with the mounting expansion of the global art world these artists turned to art as a profoundly generative site for grappling with their place in the world Wang demonstrates how they consciously and energetically sought to make their own ideas about art and art history visible in contemporary art Wang s argument is informed by extensive primary research including close examination of the artworks analysis of Chinese language documents and archives and deeply personal interviews with the artists Their words uncover layers of meaning previously obscured by the popular and often recycled assessments that many of these works have received until now Beyond Wang s reinterpretation of these individual artists she contributes to an urgent conversation on the future direction of art history how do we map engagements between art from different parts of the world that are embedded within different art histories What does it mean for histories of contemporary art and art history more generally to be inclusive The new understandings offered in this book can and should be engaged when considering current hierarchies in histories of Chinese art the global art world and the intersections between them A Short History of the Future W. Warren Wagar, 1989-09-20 In the tradition of H G Wells s *The Shape of Things to Come* W Warren Wagar s *A Short History of the Future* is a memoir of postmodern times Cast in the form of a history book the narrative voice of the book s powerful vision is that of a far future historian Peter Jensen who leaves this account of the world from the 1990s to the opening of the twenty third century as a gift to his granddaughter A dazzling and imaginative combination of fiction and scholarship Wagar s speculative history of the future alternates between descriptions of world events and intimate glimpses of his fictive historian s family through the ages Jensen s tale traces the flow of the future from the early twenty first century reign of a megacorporate global economy to its sudden collapse in 2044 when nuclear catastrophe envelops the world In the traumatic aftermath a socialist world commonwealth comes into being in the year 2062 followed by a lengthy transition to a decentralized order of technologically mature autonomous societies many located in outer space The riveting literary interludes that follow each chapter take the form of letters and documents from the history of Jensen s family evoking the everyday lives of people in the midst of these global historical events Here we meet a woman in Brazil whose son is dying

from a new immuno deficiency disease two brothers comparing life on earth with life in a space colony and many more Neither fiction nor nonfiction Wagar s brilliantly creative work is not meant to forecast the future but rather to draw attention to possibilities and alternatives for humankind and planet Earth In doing so it also serves as an unforgettable reminder that the future is being made now

The Future Knowledge Compendium Peter Ellyard,2023-03-03 THRIVING IN THE 21ST CENTURY Humans have a unique capability to both understand their situation in the world and to envision and act to realise their aspirations in the emerging

world And most of us would welcome knowing how we can become ever more skilful at both understanding and shaping the future of our emerging world so that we can thrive in it The 21st century is very different from the 20th century Globalisation the greatest economic prosperity uplifting machine humanity has ever invented and mass education are combining to sweep humanity into an emerging interdependent global village It is creating a global educated middle class that will number 5 billion in 2030 In this emerging world a world where our future prosperity will be increasingly based on metaphysical wealth on what we know 20th century nation first competitive win lose mindsets and agendas can no longer work These now yesteryear mindsets will instead undermine our best endeavours including making our future ever more climate and pandemic safe Humanity is now beginning to learn that it now has no option but to adopt planet first collaborative win win values and mindsets if it wishes to shape our emerging global village so that it can become liveable for all ever more prosperous harmonious inclusive sustainable healthy and secure Meeting these challenges successfully will require that humanity innovates for itself a new future knowledge curriculum so that it can economically thrive in a sustainable and humane manner Peter Ellyard has asked the question what would be the contents of such a curriculum In The Future Knowledge Compendium A Curriculum for Thriving in the 21st Century he has sought to answer this question

The Nineteenth Century and After, 1927 **Artificial Intelligence Today** Michael J. Wooldridge, Manuela Veloso, 2007-03-06 Artificial Intelligence is one of the most fascinating and unusual areas of academic study to have emerged this century For some AI is a true scientific discipline that has made important and fundamental contributions to the use of computation for our understanding of nature and phenomena of the human mind for others AI is the black art of computer science Artificial Intelligence Today provides a showcase for the field of AI as it stands today The editors invited contributions both from traditional subfields of AI such as theorem proving as well as from subfields that have emerged more recently such as agents AI and the Internet or synthetic actors The papers themselves are a mixture of more specialized research papers and authoritative survey papers The secondary purpose of this book is to celebrate Springer Verlag's Lecture Notes in Artificial Intelligence series

Contemporary Futurist Thought Thomas Lombardo, 2006-06-23 Contemporary Futurist Thought describes recent thinking about the future dealing with both the hopes and the fears expressed in modern times concerning what potentially lies ahead There are many such hopes and fears perhaps an overpowering number competing with each other and swirling about in the collective mind of humanity Psychologist and futurist Tom Lombardo describes this mental universe of inspiring dreams and threatening premonitions regarding the future The book begins with an in depth examination of the highly influential literary genre of science fiction which Dr Lombardo identifies as the mythology of the future He next describes the modern academic discipline of future studies which attempts to apply scientific methods and principles to an understanding of the future Social and technological trends in the twentieth century are then reviewed setting the stage for an analysis of the great contemporary transformation occurring in our present world Given the powerful

and pervasive changes taking place across the globe and throughout all aspects of human life the questions arise Where are we potentially heading and perhaps more importantly where should we be heading The final chapter provides an extensive review of different answers to these questions Describing theories and approaches that highlight science technology culture human psychology and religion among other areas of focus as well as integrative views which attempt to provide big pictures of all aspects of human life the book provides a rich and broad overview of contemporary ideas and visions about the future In the conclusion Dr Lombardo assesses and synthesizes these myriad perspectives proposing a set of key ideas central to understanding the future This book completes the study of future consciousness begun in its companion volume The Evolution of Future Consciousness These two volumes rich in historical detail and concise observations on the interrelatedness of a wide range of interdisciplinary topics are a significant contribution to the field of future studies and a valuable resource for educators consultants and anyone wishing to explore the significance of thinking about the future **A**
