

## Life on Earth

# History of Mesozoic Life

## The Age of the Dinosaurs

The Mesozoic Era is best known as the age of the dinosaurs. These large reptiles dominated the land and seas of the Earth during this era. Dinosaurs filled all the niches that are currently filled by mammals today. There were plant eating, meat eating, endothermic, bipedal, and quadrupedal dinosaurs. Dinosaur bones had canals, which indicated that they were active creatures.

### Study Tip

The Mesozoic Era can be divided into three separate periods: Triassic, Jurassic, and Cretaceous. Each period had similarities between one another as well as unique characteristics.

## Time Line

## Terrestrial Life

- Seed plants and trees diversified and spread widely.
- Lush forests covered much of the land, especially at higher altitudes.
- Flowering plants evolved during the Cretaceous.

*Archaeamphoralongicervia, a cretaceous plant*

## Marine Life

- Tiny phytoplankton became the base of the marine food web.
