Thank you for choosing the products of Armytek Optoelectronics Inc., Canada.
Please read this manual carefully before using the flashlight.

Operation

Armytek Wizard Pro flashlight has two operation types:

1. **General.** The headlamp is switched on/off permanently.
2. **Tactical.** Press and hold the button — the headlamp will deliver light while the button is held. The headlamp will switch on in the last moment when the button is released. This type of operation is useful for short-time lighting and setting signals.

To access the Tactical operation type, unhook the tailcap to 1/4, press the button and tighten the tailcap again holding the button pressed. To return to the General type, unhook the tailcap to 1/4 and tighten it again.

While in the General type, you have a convenient momentary access to the Tactical mode.

Main. Click the button in OFF-state. Press and hold — to switch 3 main modes in a cycle, and release — to select one. It is recommended after switching off to wait time you can access it in 1 click.

Maximum. Double click in Main mode for persistent activation (returns with another double click). Click (short) and hold the button in Main mode for temporary activation (returns to the last mode when button is released).

Strobe. Press and hold in OFF-state to activate. Release — for selection. Double click — returns to the last Main mode. It is recommended after switching off to wait time you can access it in 1 click (also double click).

Strobe. 4 clicks slowly in OFF-state to activate. Double click — returns to the last Main mode. Press and hold after activation to switch between 3 Strobe types and 100% beam indication. It is recommended after switching off to wait time you can access it in 1 click (also double click).

Activation. After switching off the last, used Mode (except for the Strobe) permanently for quick 1-click access at next switching on.

Lowest Voltage Indication — the headlamp is switched on for 3 seconds for the battery loading in the last mode and then clicks 3.7 volts = 3 clicks — 3 clicks (2000-2000 seconds of light). Armytek Wizard Pro flashlight is supplied with indication system — a color LED built-in to the button.

State Indication — shows flash every 4 seconds. Shows the battery voltage even in OFF-state. It can also help you to find your headlamp at night (e.g. in the dark).

State Indication can be turned on and off — unhook the tailcap to 1/4.

When ambient temperature is -20/-30°C the headlamp delivers light in Maximal mode for about 5-7 minutes and then the brightness steps down to the Main mode. 10-20 seconds afterwards the brightness returns to the Maximal level again. This stepping down is necessary to maintain the user's safety and the headlamp's functionality in the conditions of good air-cooling (the headlamp produces constant light even in Maximal mode).

Always follow the instructions from this manual and recommendations on battery usage.

Apply only the recommended power sources.

Do not use different power sources together, i.e. old ones with new ones, charged with

Care and Storage

It is recommended to clean the threads and O-ring of dirt and old grease. Remember that secure protection from water and dust cannot be provided by worn-out sealing. And fouling as well as lack of lubricant causes fast wear-out of threads and sealings rings.

To clean the threads do the following:

1. Unhook the tailcap and remove the sealing ring carefully with a toothpick (do not use sharp metal things as they can damage the ring).
2. Wipe the ring thoroughly with a soft cloth (tissue). Do not use solvents. If the sealing ring is worn out or damaged, replace it by a new one.
3. Clean the metal threads with a brush using ethanol. Be careful not to allow applied liquid to get inside the flashlight or back again. It can cause corrosion or other damage.

After cleaning lubricate the thread and the sealing ring with polytetrafluoroethylene-based oil grease, e.g. Krytox 2000. The application of automotive and other improper greases can cause sealing and damage of the sealing rings. In case of active operation and exploitation in dusty environments it is recommended to perform cleaning and lubricating of the parts as often as required, even if it occurs more than twice a year.

Service and Warranty

Armytek provides free warranty repair for 10 years from the purchase.

Warranty doesn't cover damage caused by
