and Surgery Boyd Samuel, Gutierrez Angela Maria, McCulley James P., Actualizaciones en el diagnóstico y tratamiento del queratocono Dra. Gracia Castro de Luna, Dr. Antonio Pérez Rueda, 2021-07-29 La importancia del diagnóstico y tratamiento precoz del queratocono viene dada por su alta incidencia y prevalencia en pacientes de temprana edad y su carácter evolutivo siendo la primera causa de trasplante de córnea en España. Además el sureste de la península ibérica es un área endémica de la enfermedad. La exposición a agentes alérgicos y a radiación ultravioleta podrían acelerar su aparición y progresión. En etapas avanzadas de la enfermedad existe un importante compromiso de la agudeza visual del paciente afectando gravemente a la calidad de vida del mismo. Existen una gran cantidad de tratamientos que han demostrado frenar la evolución de la enfermedad: crosslinking y mejorar la calidad visual de los pacientes: anillos corneales intraestromales los cuales podrían evitar la realización final de una queratoplastia. El estudio mediante topografía corneal de estos pacientes es imprescindible para realizar un diagnóstico precoz y evitar cirugías refractivas corneales futuras. Es de gran interés conocer las normas básicas de interpretación de la topografía corneal y los índices diagnósticos de queratocono que ayudarán a anticiparse al diagnóstico en etapas clínicas. En este libro se presentan los últimos avances en el diagnóstico y tratamiento del queratocono.
