developed countries to jump over trade barriers but also to source advanced technology and marketing capabilities Moreover their ambitious strategies have been stimulated by oligopolistic rivalry among the chaebols From a policy perspective the book provides an original discussion of national ownership by questioning the substitutability between inward and outward foreign investment and its relationship with the evolution of the national innovation system By shedding light on the pattern of Korea s internationalization these essays make a valuable contribution to the theory of international production and provide important insights for the current policy debates on globalization and innovation led growth
