Kidding Ourselves The Hidden Power Of Self Deception:

Kidding Ourselves Joseph T. Hallinan, 2014-05-20 From the Pulitzer Prize winning journalist and author of *Why We Make Mistakes* an illuminating exploration of human beings astonishing ability to deceive themselves To one degree or another we all misjudge reality Our perception of ourselves and the world around us is much more malleable than we realize This self deception influences every major aspect of our personal and social life including relationships sex politics careers and health In *Kidding Ourselves* Joseph Hallinan offers a nuts and bolts look at how this penchant shapes our everyday lives from the medicines we take to the decisions we make It shows for instance just how much the power of many modern medicines particularly anti depressants and painkillers is largely in our heads Placebos in modern day life extend beyond hospitals to fake thermostats and elevator close buttons that don't really work but give the perception that they do *Kidding Ourselves* brings together a variety of subjects linking seemingly unrelated ideas in fascinating and unexpected ways And ultimately it shows that deceiving ourselves is not always negative or foolish As increasing numbers of researchers are discovering it can be incredibly useful providing us with the resilience we need to persevere in the boardroom bedroom and beyond Provocative accessible and easily applicable to multiple facets of everyday life *Kidding Ourselves* is an extraordinary new exploration of our mind's flexibility

The Scout Mindset Julia Galef, 2021-04-13 an engaging and enlightening account from which we all can benefit The Wall Street Journal A better way to combat knee jerk biases and make smarter decisions from Julia Galef the acclaimed expert on rational decision making When it comes to what we believe humans see what they want to see In other words we have what Julia Galef calls a soldier mindset From tribalism and wishful thinking to rationalizing in our personal lives and everything in between we are driven to defend the ideas we most want to believe and shoot down those we don't But if we want to get things right more often argues Galef we should train ourselves to have a scout mindset Unlike the soldier a scout's goal isn't to defend one side over the other It's to go out survey the territory and come back with as accurate a map as possible Regardless of what they hope to be the case above all the scout wants to know what's actually true In *The Scout Mindset* Galef shows that what makes scouts better at getting things right isn't that they're smarter or more knowledgeable than everyone else It's a handful of emotional skills habits and ways of looking at the world which anyone can learn With fascinating examples ranging from how to survive being stranded in the middle of the ocean to how Jeff Bezos avoids overconfidence to how superforecasters outperform CIA operatives to Reddit threads and modern partisan politics Galef explores why our brains deceive us and what we can do to change the way we think

New York Times Saturday Book Review Supplement, 1995-06 *Useful Delusions* Shankar Vedantam, Bill Mesler, 2021-03-02 From the New York Times best selling author and host of *Hidden Brain* comes a thought provoking look at the role of self deception in human flourishing Self deception does terrible harm to us to our communities and to the planet But if it is so bad for us why is it ubiquitous In *Useful Delusions* Shankar Vedantam and Bill Mesler argue that paradoxically self deception can also play a vital role in our success and well being The lies we tell ourselves sustain our daily interactions with friends lovers and coworkers They can explain why some people live longer than others why some couples remain in love and others don't why some nations hold together while others splinter Filled with powerful personal stories and drawing on new insights in psychology neuroscience and philosophy *Useful Delusions* offers a fascinating tour of what it really means to be human **Open Secrets** Raphael Ogbu, 2023-10-31 The Power of Self Deception Introduction In the vast labyrinth of the human mind lies a power so profound and pervasive that it can shape our reality define our choices and shield us from uncomfortable truths This power is none other than self deception a captivating force that permeates every corner of our existence Welcome to the intriguing world of *Open Secrets* where we explore the depths of our own minds and uncover the hidden truths we subconsciously choose to hide from ourselves The Illusion of Security Deep within our psyche a delicate dance takes place as we construct a carefully woven tapestry of illusions to shield ourselves from the discomfort of reality Self deception becomes a fortress a refuge from the harsh truths that threaten to shatter our sense of security We convince

ourselves of falsehoods creating a cocoon of ignorance that envelops us providing a temporary solace from the inconvenient and painful aspects of life It is in this delicate balance between truth and self deception that the power lies We cling to our illusions finding solace in the comfort they bring We ignore the warning signs the subtle cues that speak of a reality we fear to face We suppress our doubts silencing the nagging voice within us that dares to challenge our carefully constructed narratives We bury the truths that make us uncomfortable denying their existence in favor of a more palatable version of reality The Consequences of Ignorance But what happens when we turn a blind eye to the truth What are the consequences of our self deception The cost can be high as our illusions and hidden secrets intertwine to shape our thoughts emotions and actions We find ourselves caught in a web of cognitive dissonance where our beliefs clash with the stark reality before us The dissonance festers gnawing at our peace of mind eroding our well being and inhibiting our personal growth Self deception acts as a double edged sword offering fleeting respite from uncomfortable truths while perpetuating a cycle of stagnation It blinds us to the areas in our lives that require improvement shielding us from acknowledging our flaws and hindering our ability to make meaningful changes By hiding from ourselves we remain trapped in a state of complacency unaware of the immense potential for growth and transformation that lies within us Unveiling the Veil Yet as paradoxical as it may seem self deception also holds within it the seeds of liberation By embarking on a journey of self discovery and embracing the courage to confront our hidden secrets we can begin to dismantle the walls of deception we have erected Peering behind the veil we expose the truths we have long sought to hide and embark on a path of self awareness and personal evolution In the chapters that follow we will delve deep into the intricate mechanisms of self deception exploring the psychological social and cultural factors that perpetuate its hold over us We will unravel the mysteries of our own minds shining a light on the Open Secrets we have buried within ourselves Together we will embark on a transformative journey toward a life free from the chains of self deception where authenticity and truth reign supreme Conclusion As we embark on this exploration of Open Secrets we must acknowledge the immense power of self deception in shaping our lives It is through understanding this power that we can begin to reclaim our agency and navigate the intricate terrain of our own minds The journey may be daunting but the rewards are immeasurable Let us brace ourselves as we venture into the depths of our hidden truths for only by confronting the secrets we hide from ourselves can we truly embark on a path of self discovery and personal fulfillment
