the different medications As it turns out I found out that there were a lot of other options I could try first before using the prescription meds most of them work to treat the symptoms not the actual cause of your kidney stones Plus there can be side effects All I am saying is How I became a kidney stone expert Ok I m not really an expert but I ve done WAY more research on kidney stones than the average person I started my research on the internet And I spent a lot of time in the library looking through health books magazines and articles Not only did I discover a ton of information about how the body works and what causes kidney stones I also found out about all the different options to treat or prevent kidney stones After pouring over hundreds of articles reading tons of web sites and flipping through a truck load of books I finally discovered a natural remedy that worked for me Relief with this natural remedy was safe and extremely easy and it s so SIMPLE that most people completely overlook it After just a few weeks I was starting to feel relief a few more and there was no pain at all and in just months I visited my doctor again to hear the kidney stones had completely dissolved After everything was better again I realized something else I had learned a LOT of information that could help other people who were suffering like me So I compiled all my research and created the straight to the point simple guide I wish I could have found when I was looking for a solution to my kidney stone problems
