Many people make the mistake of approaching Facebook Ads the same way they approach Google AdWords and other forms of paid advertisement. What they fail to realize is that people approach Facebook for completely different reasons than the reasons for which they approach Google and other online platforms. When people are on Google and Amazon for example they are actively looking for information and are even actively looking to spend money on solutions to their problems. When people are on Facebook they could be looking for information but often they are looking for user generated content and entertainment. Thus you need to completely re-orient the way you approach Facebook ads to efficiently reach the right customers in effective ways where they will be receptive to your message. If you are just copying and pasting what you do for Google ads you are wasting your money. This is just one of the many ways people fail to adequately take advantage of and understand Facebook's robust advertising platform. This is one of the many issues that will be addressed later in this book. We have all come in contact with Facebook Ads whether we realize it or not. In this book we will discuss the important facets of Facebook Advertising from what it is whether it is important for your business the how to's and many other great incentives that advertisers and marketers need to know. It's 2020 and by now you know that everywhere you look on the internet you will be bombarded with ads. Facebook data is one of the most important ways 3rd parties collect information about consumers to effectively market to them. Facebook heavily influences people's online habits and Facebook ads when used effectively can be some of the most powerful tools to a digital marketer. So what are they? We see them all the time but do we know anything about them? Here's a little info about Facebook Ads. With Facebook ads you are generally in control of your creative elements as you are the advertiser. This includes the title of the ad, the images used, the design and the text. Facebook ads use an auction type method wherein those who want to use Facebook ads are charged based on the clicks they receive, the impressions the ad gets and the actions they result in. There are different formats of ads that Facebook offers which users can use.
