audiences it has merely shifted who pays and how Challenging some of the most enduring myths of digital life Hindman explains why the internet is not the postindustrial technology that has been sold to the public how it has become mathematically impossible for grad students in a garage to beat Google and why net neutrality alone is no guarantee of an open internet He also explains why the challenges for local digital news outlets and other small players are worse than they appear and demonstrates what it really takes to grow a digital audience and stay alive in today s online economy The Internet Trap shows why even on the internet there is still no such thing as a free audience
