Utheim,2024-03-01 The central role of education in responding to climate change is noted by stakeholders of all kinds Yet for

education to act as a vehicle of change it must become more holistic inclusive critically reflexive and transformative Most critically it must transcend the grip of Western hegemonic reasoning of modern colonial habits of seeing perceiving relating and structuring as the only legitimate means of making sense of life and the earth we inhabit together Because drivers of climate change involve multidimensional intersecting anthropogenic processes that are at once global and local in scope and are often intimately personal in ways difficult to discern directly educating to sustain the future will require competencies that exist beyond science and technological innovation In Soft Science Sustainability Ragnhild Utheim uses social cartography to explore the metacognitive psychosocial intercultural collaborative and interactive systems dimensions of what it means to sustain our common future together The 3C cartography examines the less tangible human behaviors thoughts and emotions worldviews interdependencies complexities and dynamic adaptability that factor into climate change and its threats to human and other than human life on earth King of the World Matt Waters,2022-05-13 The Persian Empire was the world s dominant geo political force from the later sixth century to its conquest by Alexander in the 330s BCE Much of the empire s territory was conquered by its founder Cyrus the Great King of the World provides the most cohesive and readable portrait of the ruler whose immense impact on ancient civilization is not fully appreciated *Dating Beowulf* Daniel C. In My Time of Dying John Parker, 2025-03-25. Why do people die and where do they go when they are dead? How should the dead be buried and mourned in order to ensure that they continue to work for the benefit of the living? How have perceptions and experiences of death and the ends of life changed over the centuries? *In My Time of Dying* considers these questions from the perspective of African history. In what is the first history of death in Africa, John Parker examines mortuary culture and the ongoing relationship between the living and the dead over a four hundred year period. Focusing anecdotally on West Africa but with a comparative awareness of comparable practices throughout the continent, Parker highlights how Africans developed the world's most vibrant and recognizable cultures of death.

Republic of Indians Bradley J. Dixon, 2024-12-03. A sweeping history of the Native Southerners who wrote their principles into Spanish and English law. A sweeping history of the Native Southerners who challenged European empires from the inside. *Republic of Indians* tells the story of Indigenous leaders who wrote their principles into Spanish and English law. While in the Spanish Empire, Natives were a recognized part of *la república de indios*, the republic of Indians, other Natives across the early American South understood themselves to be joined with European colonists in larger polities, each jealously guarding their own bodies of liberties under royal sanction. Thus, rather than simply rejecting European pretensions to rule them as subjects and vassals, Native Southerners as diverse as the Apalachees, Pamunkeys, Powhatans, and Timucuas redefined their status to become political players in legislative assemblies and the courts of distant monarchs. They pushed for incorporation in larger political systems in which they had a say and were themselves instrumental in creating. Adapting pre-invasion practices to the technology of writing and the challenges of colonialism, Indigenous petitioners sought exemptions from labor and protection for the lands that God gave to them, as well as the right to install preferred leaders, avoid enslavement, ally with the Crown against colonists, ease harsh colonial laws, and even amend the terms of treaties and compacts. Bradley J. Dixon shows how their petitions also stand as enduring contributions to American political thought and how it was these vassals and subjects who gave meaning to the modern idea of tribal sovereignty. In the South, the Spanish and English empires came to resemble one another precisely because they were both dependent to a remarkable degree on maintaining Indigenous political consent and were founded in large part on Indigenous conceptions of law.

Nation and Empire as Two Trends of Political Organization in the Iron Age Levant Hualong MEI, 2023-11-13. In *Nation and Empire as Two Trends of Political Organization in the Iron Age Levant*, MEI Hualong offers an analysis of national and imperial ideologies, two political principles that influenced the establishment, consolidation, and expansion of trans-local, trans-tribal polities in the Iron Age Levant. By examining key terminologies, historical accounts, and literary sources, MEI argues that the elites of ancient nations may attempt to reshape their political and cultural identity in

imperial terms vice versa but to a lesser extent The conceptual transformation from the one to the other is closely related to the political entity s consciousness and understanding of limits and boundaries political and cultural real and imagined
