

Blank's Levels of Questioning

LEVEL 1

The objects/things are present (here and now).

What's that?

Who's that?

What are you doing?

What's the lady doing?

Find one like this.

Find one the same as this.

What did you touch?

What's that called?

LEVEL 2

The objects/things are present (here and now), but the child has to look at them in more detail.

What's happening?

What is in the box?

Where's Spot?

What colour is the ball?

What can you do with a ball?

How are these different?

Tell me something that is a fruit.

Find the one that is ... and ...

What can you do with scissors?

Where's the chicken?

LEVEL 3

The objects/things may or may not be present and the questions are more complex and subtle.

Find one to use with this. (knife → fork)

What will happen next?

Tell me something different that ...

What is a ...? (word definition)

Find the things that are not ...

Following a set of directions → First open the box. Then put the ball in the box. Then hide the box.

How are "these" the same?

LEVEL 4

The objects/things are not present and the child must use reasoning and problem solving.

What will happen if....?

What could you do when?

How can we tell that ...?

What could we use to ...?

Why can't we ...?

Why is a ... made of ...?

Why can't we ride a lion?

Origins of Intelligence M. Lewis,2013-11-11 A preface is an excellent opportunity for an editor to speak directly to the reader and share with him the goals hopes struggles and production of a volume such as this It seems to me that I have an important obligation to tell you the origins of this volume This is no idle chatter but rather an integral part of scientific inquiry It is important before delving into content theory and methodology to talk about motivation values and goals Indeed it is always necessary to explicate from the very beginning of any intellectual and scientific inquiry the implicit assumptions governing that exercise Failure to do so is not only an ethical but a scientific failure We learn albeit all too slowly that science is a moral enterprise and that values must be explicitly stated removing from the shadows those implicit beliefs that often motivate and determine our results No better or more relevant example can be found than in the review of the implicit assumptions of the early IQ psychometricians in this country see Kamin s book *The Science and Politics of IQ* 1975 *A Self-directing Guide to the Study of Child Psychology* Gerald Richard Levin,1973

Thinking and Learning Skills S. F. Chipman,J. W. Segal,R. Glaser,2013-09-05 First Published in 1985 Currently two streams of endeavor offer promise for improving school effectiveness in developing students higher cognitive capacities One of these is

represented by the increased interest of school districts colleges and universities in identifying ways to help their students build the cognitive skills that enable them to learn and think effectively What can be done they ask beyond teaching the fundamentals of reading writing arithmetic and subject matter knowledge to enable students to use their skills and knowledge for effective problem solving reasoning and comprehension The second stream is apparent in recent scientific advances in the study of intelligence human development problem solving the structure of acquired knowledge and the skills of learning This is volume two of a collection of conference papers based on this topic Perspectives on Human Deprivation: Biological, Psychological, and Sociological National Institute of Child Health and Human Development (U.S.),1968 *A Survey of the City Schools of Marion, Illinois* Walter Scott Monroe,1924 **Perspectives on Human Deprivation** National Institute of Child Health and Human Development (U.S.),1968 Language and Poverty Frederick Williams,2013-09-24 Language and Poverty Perspectives on a Theme is a collection of papers that juxtaposes different perspectives on the definition of language and language behavior in relation to poverty The book brings together a broad range of perspectives pertinent to language and poverty specifically that of poor children Topics on the language of the poor how to construct effective language programs for the poverty child biological and social factors in language development and standardized assessment of the language of disadvantaged children are covered Policy makers social workers language teachers sociologists psychologists and educators will find the text invaluable **Applied Child Study** Anthony D. Pellegrini,1991 The importance of the development and upbringing of children has been recognized since the era of Plato We have often used the study of children to help us better understand ourselves and our society In this second edition basic theories of learning and development are outlined and applied to dimensions of children s social cognitive and linguistic development Pellegrini takes his readers through some of the main issues in studying development and then introduces a range of research methods such as observational methodology which can be used to describe typical behavior patterns of young children The author also highlights the advantages and shortcomings of each approach for example how experimental research has benefits in the control achieved but is also lacking in terms of ecological validity Both qualitative ethnological and ethnographic and quantitative tests and experiments methods of studying children are discussed broadening the scope even further for those involved in child study
