Preface One of our vocations as old hardened researchers has always been to seek solutions for the prevention of  
occupational risk of biomechanical overload and to teach self management of the problems at the source Prevention should  
be done directly by those designing workplaces and jobs Our experience comes from constant comparisons between the need  
to respond to the actual needs of workers and technical staff who require practical tools simple and easily applicable in the  
field and the need to find answers solutions and criteria by experimentally verified reliable methods being often quite  
complex In short translation of the matter complexity into easily applicable prevention approaches is just one of the main  
goals of the Ergonomics of Posture and Movement EPM Research Unit which we founded and in which Enrico and I have  
operated for many years under the sponsorship of Don Gnocchi ONLUS Foundation IRCCS Santa Maria Nascente Milan Polo  
Tecnologico Another important goal is to diffuse the knowledge on the matter Following a series of meetings with colleagues  
and technicians at congresses and meetings in different parts of the world the idea to create an International School of  
Ergonomics of Posture and Movement was originated Thus we created the school as an operative section of EPM more  
details can be found at [www.epmresearch.org](http://www.epmresearch.org) The school has its accredited teachers and has the main objective to teach  
different professionals in different parts of the world and in their native language the art of prevention according to an easy  
and effective approach In summary EPM and its schools have the following main goals in relation to the broader aim of  
improving health and work      Safety Manual for Furniture Trades ,19??      **Skid-steer** Association of Equipment
