and East Asians understand how each other thinks As Jin Li shows in this groundbreaking work the differences run deep Li explores the philosophical origins of the concept of self in both cultures and synthesizes her findings with cutting edge psychological research to reveal a fundamental contrast Westerners tend to think of the self as being as a stable entity fixed in time and place East Asians think of the self as relational and embedded in a process of becoming The differences show in our intellectual traditions our vocabulary and our grammar They are even apparent in our politics the West is more interested in individual rights and East Asians in collective wellbeing Deepening global exchanges may lead to some blurring and even integration of these cultural tendencies but research suggests that the basic self models rooted in long standing philosophies are likely to endure The Self in the West and East Asia is an enriching and enlightening account of a crucial subject at a time when relations between East and West have moved center stage in international affairs **Focus On: 100**
